Fixed-satellite service (short: FSS | also: fixed-satellite radiocommunication service) is - according to article 1.21 of the International Telecommunication Union's (ITU) Radio Regulations (RR) - defined as A radiocommunication service between earth stations at given positions, when one or more satellites are used; the given position may be a specified fixed point or any fixed point ...

Fixed-satellite service - Wikipedia

Introduction to Satellite Communication is designed to meet the needs of working professionals and students. The first edition was a response to a request by many friends and associates for a basic and clear book that provides newcomers with an accessible way to gain knowledge and become productive. The second edition

Introduction to Satellite Communication 3rd Edition

The antenna diameter will be 1.6 meter and we will be transmitting signals ranging from 71-76GHz and 81-86GHz. Our satellite will use the 71-76GHz bands for its receiving signal and the 81-86GHz for the transmitting signals. Both will use the same satellite dish to conduct telecommunications, which will help us reduce part cost and complexity.

As a Satellite Communication Systems Operator-Maintainer, you'll be responsible for all technical aspects of satellite equipment installation, operations, configuration, and alignment in order to keep lines of communication up and running.

Satellite Communication Systems Operator | goarmy.com

bya or b.y.a. is an abbreviation for "billion years ago".It is commonly used as a unit of time to denote length of time before the present in 10 9 years. This initialism is often used in the sciences of astronomy, geology, and paleontology.. The "billion" in bya is the 10 9 "billion" of the short scale of the U.S., not the long-scale 10 12 "billion" of some European usage.
