Sea Areas A1,A2&A3 - RAADBECO

Sea Area A3: the area, excluding Sea Areas A1 and A2, within the coverage of an Inmarsat geostationary satellite in which continuous alerting is available; and. Sea Area A4: an area outside sea areas A1, A2 and A3.

For international operational purposes the GMDSS system subdivides the World into 4 main geographical Sea Areas, that are GMDSS Sea Areas A1, A2, A3 and A4. The communication range of the different types of radio communication systems necessarily carried on board of SOLAS vessels at sea, substantially defines the geographical boundaries of these Sea Areas.

Sea Area A4—An area outside Sea Areas A1, A2 and A3 is called Sea Area A4. This is essentially the polar regions, north and south of about 76 degrees of latitude , excluding any A1, A2 and A3 areas.

DECLARATION OF SEA AREA A1

Overview of GMDSS Sea Areas and Radio Safety Equipment ...

Ships engaged on voyages in sea areas A1 and A2 are required to use at least one of the three maintenance methods outlined above, or a combination as may be approved by their administration. Ships engaged on voyages in sea areas A3 and A4 are required to use at least two of the methods outlined above.

The range of sea area A2 should be verified by field strength measurements. SEA AREA A3 Sea area A3 is that sea area of the world not being part of any sea area A1 or A2 within which the elevation angle of an Inmarsat satellite is 5° or more. SEA AREA A4 Sea area A4 is that sea area of the world not being part of any sea area A1, A2 or A3.

Sea Area A3: Excluding Sea Areas A1 & A2, this area is within coverage of INMARSAT geostationary satellites. Here a complete VHF radio and either a MF/HF radio or INMARSAT station is required. This area covers 70-degrees North Latitude and 70-degrees South Latitude. Sea Area A4: This area excludes Sea Area's A1, A2 & A3 and is essentially the ...
