The National Association of City Transportation Officials (NACTO) and the Global Designing Cities Initiative recently announced the launch of the Global Street Design Guide as a globally accessible document that can be downloaded at no cost, allowing urban planners, designers and transportation practitioners in cities around the world to immediately implement tested and life-saving street designs.

Bell Street Park is the City of Seattle's first shared street project, establishing a new typology for streets as parks and open space. Initiated by Belltown neighborhood residents, Bell Street demonstrates how a bold vision for transformation can be realized through inclusive design and strong city/community collaboration.

The NACTO Transit Street Design Guide places transit where it belongs, at the heart of street design. The guide shows how streets of every size can be redesigned to create great transit streets, supporting great neighborhoods and downtowns.

It's also why some of our buses have 360' advertisements plastered over the windows; those ads count as fare revenue. So when you're sitting on the bus trying to imagine what the street looks like outside without looking through each ad's matrix of dots, you can thank the state legislature for making that necessary.

Streets are the lifeblood of our communities and the foundation of our urban economies. They make up more than 80 percent of all public space in cities and have the potential to foster business activity, serve as a front yard for residents, and provide a safe place for people to get around, whether on foot, bicycle, car, or transit.
