Simplicity, clarity and logical presentation are distinct hallmarks of the book. Chapter outline, objectives and summaries together with tables, figures, examples and graphic materials in every chapter guide the readers throughout the book.

For courses in Pediatric Nursing. A comprehensive survey of family-centered pediatric nursing care Child Health Nursing: Partnering with Children & Families promotes excellence in nursing care for infants, children, and adolescents--in hospitals and in the community. It focuses on the impor-

tance of partnering with families to adapt care plans for children based on their age, health status, and social and cultural influences. The text considers the impact of contemporary care environments on nursing practice, both in health promotion and in the care of children with acute or chronic health conditions. By offering industry best practices and practical applications, the book encourages students to apply evidence-based findings and clinical reasoning to planning superior care. The updated 3rd edition explains how modern nursing practice is affected by reforms to health-care and its delivery-such as electronic health records, new approaches to chronic and acute condition management, and a focus on prevention. To support safe, effective, and innovative care, this edition draws on the latest recommendations of NANDA International diagnoses, Nursing Intervention Classifications (NIC), Nursing Outcomes Classifications (NOC), and Healthy People 2020. Also available with MyLab Nursing MyLab(tm) Nursing is an online self-study and class preparation program designed to engage students and improve results. Quick Review Series: BSc Nursing, 4th Year E-BOOK

SGN.The Ebook NCLEX-RN Exam Covers Nursing Subject Multiple Choice Single Response Questions With Answers.

The book presents five significant areas of learning within professional programmes of preparation most applicable to student nurses and midwives in their pre-registration education but also with relevance to other learners on healthcare related disciplines. This volume has emerged from several sources: the editor's role as a Director for Learning and Teaching in Adult, Child Nursing and Midwifery and also from an EU funded project looking at quality benchmarks and assuring clinical learning environments (HEALINT). The Francis Report

(Francis 2013) and the Shape of Caring Report (Willis 2015) highlighted challenges related to practice learning and mark a renewed focus in its overall significance (Morley et al 2017). In addition to discussions regarding models of support in practice, there is also a clear emphasis on the need for nurses to have the knowledge and skills to undertake more flexible roles and an increasing requirement for nurses to have higher order knowledge and skills at the point of registration, according to the UK Nursing and Midwifery Council (NMC 2017). The book will meet these new educational needs especially for educators working in Nurse and midwife colleges. The new standards of proficiency for pre-registration nursing were published in 2018, with all higher education institutions (HEIs) approved to deliver the programme from September 2019. This creates a demand for a publication which explores the potential impact of a new education approach and issues with preparation (teaching and learning) for nurses and the breadth and dimensions of teaching and learning. NMC proposed roles of Practice Supervisor, Practice Assessor and Academic Assessor will not have a prescribed preparation pro-

gramme and universities and practice partners will be seeking guidance and direction in developing local programmes of preparation.

It was a long-time desire of nursing fraternity to have a textbook on nursing education that has the content for all the units of the INC-prescribed syllabus. This book pointedly deals with all the contents specified by the INC curriculum. The book has been written keeping in mind the requirements of the modern Indian nurse educators—what they need to know and practice in the classroom. This book provides comprehensive study material and practice exercises on Nursing Education the way it is used in day-to-day conversations in the hospital environment.
