How to create list from template in sharepoint November 30, 2019 In this article, we are going to learn how to create a list from list template or using(.stp) file or we can say create list from existing list. Once you save the list as a template, It appears into List template option under the web designer gallery on site setting page. ...

click the "custom" tab and "Select template later". This is an important step that allows you to choose your communication, model site template later. Below that, be sure to use the old style people picker to choose an admin for the site. Click OK and your site will be created.

Go to the home page of the site. Select + New, and then select Page. Alternately, you can go to an existing page, select + New, and select Start from a blank page. Or, you can choose Copy of this page to create a new page that has the same web parts and content as the existing page.

The modern site theming experience has been rolled out to classic site templates, too. While the new client-side theming architecture is more performant, if you have customizations on classic sites that aren't rendering properly after you change the site's theme, you can opt the site out of the new theming experience by disabling the feature.

Step 3: Make new page the homepage. By default, the Out of the Box classic page located in SitePages Document Library (SitePages/Home.aspx) is the homepage. We need to make our new modern page the Homepage (meaning that when users click on Home they are routed to the modern page experience). To do this:

To create a document center, see Using templates to create different kinds of SharePoint sites.

What's in a Document Center site? The Document Center site template contains features that make it easier and more efficient to create and manage large sets of documents. In most cases, a site owner can add each of these features separately.

*Save, download, and upload a SharePoint site as a template ...*

SharePoint site templates are prebuilt definitions designed around a particular business need. You can use these templates as they are to create your own SharePoint site, and then customize the site as much as you want. You're probably familiar with the default site templates, such as Team Site, Project Site, and Communities Site.

Create a communication site to use for the home site, and customize it using built-in features as much as possible: Use the megamenu style for navigation and add a site footer. For info, see [Change the look of your SharePoint site](#). Try out various page layouts, including the vertical section. For info, see [Add sections and columns](#).
