Teaching for Historical Literacy combines the elements of historical literacy into a coherent instructional framework for teachers. It identifies the role of historical literacy, analyzes its importance in the evolving educational landscape, and details the action steps necessary for teachers to implement its principles throughout a unit. These steps are drawn from the reflections of real teachers, grounded in educational research, and consistent with the Common Core State Standards. The instructional arc formed by authors Matthew T. Downey and Kelly A. Long takes teachers from start to finish, from managing the prior learning of students to developing their metacognition and creating synthesis at the end of a unit of study. It includes introducing topics by creating a conceptual overview, helping students collect and analyze evidence, and engaging students in multiple kinds of learning, including factual, procedural, conceptual, and metacognitive. This book is a must-have resource for teachers and students of teaching interested in improving their instructional skills, building historical literacy, and being at the forefront of the evolving field of history education.

The guide is intended to provide transit agency staff with an easy-to-use resource for improving pedestrian safety. The guide includes a variety of approaches to address common pedestrian safety issues that are likely to arise near transit stations, bus stops, and other places where transit (bus or rail) is operated. It provides references to publications, guides and other tools to identify pedestrian safety problems. Descriptions of engineering, education and enforcement programs that have been effectively applied by transit agencies are included as well as background information about pedestrian safety and access to transit.

This book is designed to help teachers develop three strands of reinforcement in classroom management. Support, Interventions, and Reinforcement will be addressed in ways that help classroom teachers braid behavioral techniques into their strategies. The book will focus on environmental changes, replacement behavior teaching, and impacting our reactions as educators so that we feed the replacement behavior and extinguish the target behavior.

This book will be invaluable for those in the academic library who want to understand how best to serve students on the autism spectrum and how those students can contribute to the library. • Serves as an essential resource on how to serve students with autism spectrum disorder (ASD) • Offers an overview of characteristics of students with ASD that is tailored to those working in academic libraries and shows how those characteristics will affect various types of interactions • Provides practical solutions for common issues that librarians/ and staff may encounter when communicating with ASD students • Features tips and ideas for librarians and library staff working at service points (e.g.i.e., reference desk, circulation, etc.) and in the instruction classroom

Discover the mysteries of science with Future Geniuses! Darwin the chicken feels like the smallest animal in the farm, but he wants to be big and strong like a dinosaur. Come along with Valentina, a young paleontologist, in this adventure about the history of evolution and find out how she gets Darwin to feel proud of who he is! Valentina and Darwin travel back in time to find the origin of life. They go all the way back, before there were any plants or even animals in the world. Valentina teaches Darwin about unicellular organisms, bad and good mutations, and variations. Then they observe microevolutions and macroevolutions, which lead to new species. Soon, Valentine and Darwin are surrounded by invertebrates and vertebrates and then—dinosaurs! But what happened to the dinosaurs? And how did the dinosaurs eventually evolve into birds? Future Geniuses is a collection that will help families spend a lot of time reading and learning together. Through simple text and fun illustrations, author and scientist Carlos Pazos makes the subjects of evolution, and specifically dinosaurs and their creation and extinction, approachable and easy to understand for even the smallest scientists.
