A new edition of a popular college reference features thirty percent new articles addressing current issues of contemporary sociology, from politics and religion to crime and poverty, in a volume that links each article to related chapters in widely used introductory textbooks. Original. 35,000 first printing.

This best-selling comprehensive book conveys the relevance of sociology by presenting a timely collection of theories, research, and examples -- including its signature first-person accounts that open many chapters. These lived experiences are relevant to students and introduce themes that provide a framework for learning the chapter material. Kendall's vivid and inviting writing style, emphasis on applications, and eye for compelling current examples further highlight sociology's relevance to all students. Now in its eleventh edition, SOCIOLOGY IN OUR TIMES is acclaimed for being the first textbook to integrate race, class, and gender issues, and for its thorough presentation of sociological theory, including contemporary perspectives such as feminism and postmodernism. This edition focuses more on social/global change and on the contemporary world, presenting such current debates as bullying and social media abuse, digital-age methods to increase school attendance, food trucks and the spread of culture, modern slavery, and weight bias. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Many White people, and some conservative Black people, believe that affirmative action programs are unfairly depriving more deserving Whites of jobs and education opportunities. The author argues that is a myth. For example, University admissions data demonstrates that, despite affirmative action rhetoric, there remains systemic bias against Black students. Sociological data on criminal record, race, and employment, found that White people with a criminal record had a better chance of getting a call back, than Black people without one. Renowned Professor of Social Work Dr Rudolph Alexander Jr. analyses many examples which demonstrate that the claim that affirmative action programs have led to unfair discrimination against White people of equal ability, is a myth. Though not always comfortable reading, the book is an important addition to the literature on equality, diversity, and critical race theory.

Seeing Social Problems: The Hidden Stories Behind Contemporary Issues shows students how to think about social problems in a new way, by carefully analyzing headline-making issues they are already familiar with and illustrating the connection between individual problems and larger social forces. Each chapter engages students in thinking about the world sociologically by focusing on a

specific case study that represents a more general social problem. The chapters always start with the knowledge, beliefs, attitudes, and personal experiences that students bring to the case—and author Ira Silver refers to as the conventional wisdom—and effectively demonstrate to them the “first wisdom” of sociology: “things are not what they seem.” In each instance, Silver shows how sociologists ask questions, gather empirical data, use multiple perspectives, and consider larger social forces to discover the “hidden stories” behind individual behavior.

The future of the sociologist's profession is jeopardized by an ongoing trend toward the politicization of sociology and the radicalization of social problems. This book calls for the rethinking of the culture of social, political, and economic liberty to create a resurgence of a sociological agenda. Social Problems in a Free Society offers an original perspective on social problems such as violations of the principles of individual rights and the free market. This book is a vision for reinvigorating the discipline in a fashion undreamt of within the wearisome strains of today's radical social problems theory.

Empower your students to become part of the solution. With a clear and upbeat voice, author Anna Leon-Guerrero's thought-provoking overview of social problems challenges readers to understand and recognize social problems in their communities and inspires them to become part of the solution. The Fifth Edition of Social Problems: Community, Policy, and Social Action goes beyond the typical presentation of contemporary social problems and their consequences by emphasizing the importance and effectiveness of community involvement to achieve real solutions. With an overarching focus on social inequalities and policy, this proven text provides a platform for discussion that encourages critical thinking and inspires hope. “The extra emphasis on social action and movements is a real strength...I like that the three major perspectives are used in each chapter as I feel many texts just put that in the first chapter and then forget about it.” —Todd Michael Callais, University of Cincinnati-Blue Ash

In this work, Internet exercises are placed at the end of each chapter. Spousal abuse is used as a new unifying example in the Research Methods chapter.

This Fourth Edition of George Ritzer's *Introduction to Sociology* shows students the relevance of sociology to their lives. While providing a rock-solid foundation, Ritzer illuminates traditional sociological concepts and theories, as well as some of the most compelling contemporary social phenomena: globalization, consumer culture, the digital world, and the "McDonaldization" of society. With examples on every page from current events and contemporary research, and stories about "public" sociologists who are engaging with the critical issues of today, the text demonstrates the power of sociology to explain the world, and the diversity of questions that sociologists seek to answer. New to this Edition New "Trending" boxes focus on influential books written by sociologists that have become part of the public conversation about important issues. Replacing "Public Sociology" boxes, these boxes demonstrate the diversity of sociology's practitioners, methods, and subject matter, and feature such authors as: Michelle Alexander (*The New Jim Crow*) Elizabeth Armstrong and Laura Hamilton (*Paying for the Party*) Randol Contreras (*The Stick-Up Kids*) Matthew Desmond (*Evicted*) Kimberly Hoang (*Dealing in Desire*) Arlie Hochschild (*Strangers in Their Own Land*) Eric Klinenberg (*Going Solo*) C.J. Pascoe (*Dude, You're a Fag*) Lori Peek and Alice Fothergill (*Children of Katrina*) Allison Pugh (*The Tumbleweed Society*) Updated examples in the text and "Digital Living" boxes keep pace with changes in digital technology and online practices, including Uber, bitcoin, net neutrality, digital privacy, WikiLeaks, and cyberactivism.
