This edited collection provides readers with a superb introduction to some of the contemporary issues related to diversity, community, and justice in the Canadian context. Grounded in theories of community justice and applied social justice, the text provides a historical, theoretical, and intersectional approach to understanding justice and its everyday manifestations for members of diverse populations in Canadian society. Diversity, Justice, and Community encourages reflection on the systemic factors that result in the production of criminality in marginalized and oppressed communities. The authors highlight the ways in which differently located groups—including Indigenous peoples, women and girls, Black males, Somali youths, the South Asian community, and transgendered prisoners—experience the justice system, while also critiquing standard notions of justice and equity and pointing towards potential solutions to combat inequalities at both the community and institutional level. Disrupting the taken-for-granted assumptions regarding who is a criminal, Diversity, Justice, and Community takes an honest look at both the challenges and the opportunities that exist for Canada's increasingly multiracial, multi-ethnic, multicultural, and religiously and sexually diverse population. Featuring chapter objectives, discussion questions, and additional resources, this engaging text is ideal for students in criminal justice, police studies, police foundations, and criminology programs.

This book puts contemporary Turkish media under the microscope. It sheds light on current trends and debates in the fields of cinema, television and new media in Turkey, and considers different aspects of communications and mass media in the country in relation to up-to-date issues, ranging from film aesthetics and televised ideologies to new tendencies in marketing and journalism in a digitalized world. While the book is a collection of original research studies obtaining their data within different methodological approaches varying from content analysis to semiotics, the collection presents a critical and holistic view. In this book, one of the leading social theorists and cultural commentators of modern times, turns his gaze on consumption. George Ritzer, author of the famous McDonaldization Thesis, demonstrates the irrational consequences of the rational desire to consume and commodify. He examines

how McDonaldization might be resisted, and situates the reader in the new cultural spaces that are emerging in society: shopping malls, casino hotels, Disneyfied theme parks and Las Vegas -- the new ‘cathedrals of consumption’ as he calls them. The book shows how new processes of consumption relate to globalization theory. In illuminating discussions of the work of Thorstein Veblen and the French situationists, Ritzer unearths the roots of problems of consumption in older sociological traditions. He indicates how transgression is bound up with consumption, through an investigation of the obscene in popular and postmodern culture.

From schools to the military and from class structure to cultural diversity—all individuals function within complex social systems that shape them and are, in turn, shaped by them. This text introduces students to these broader social contexts within which human behavior occurs and how a community's social settings may promote or deter people in maintaining or achieving personal health and well-being. Johnson and Rhodes use seven basic theoretical perspectives as the frameworks to explore how clients are impacted by social institutions and social structures. Keeping up to date with emerging societal trends and changing environmental contexts is important and Human Behavior and the Larger Social Environment provides readers with the tools necessary to use their knowledge to provide appropriate interventions at all levels of practice, as well as promote social and economic justice. This book offers complex concepts in a simple format, allowing students to analyze the relationship between individuals and various systems, and better retain and apply their knowledge as they prepare to engage with clients and client systems.

This book challenges sociologists and sociology students to think beyond the construction of social problems to tackle a central question: What do sociologists do with the analytic tools and academic skills afforded by their discipline to respond to social problems? Service Sociology posits that a cen-

tral role of sociology is not simply to analyse and interpret social problems, but to act in the world in an informed manner to ameliorate suffering and address the structural causes of these problems. This volume provides a unique contribution to this approach to sociology, exploring the intersection between its role as an academic discipline and its practice in the service of communities and people. With both contemporary and historical analyses, the book traces the legacy, characteristics, contours, and goals of the sociology of service, shedding light on its roots in early American sociology and its deep connections to activism, before examining the social context that underlies the call for volunteerism, community involvement and non-profit organisations, as well as the strategies that have promise in remedying contemporary social problems. Presenting examples of concrete social problems from around the world, including issues of democratic participation, poverty and unemployment, student involvement in microlending, disaster mitigation, the organization and leadership of social movements, homelessness, activism around HIV/AIDS and service spring breaks, *Service Sociology and Academic Engagement in Social Problems* explores the utility of public teaching, participatory action research, and service learning in the classroom as a contribution to the community.
