Once you have the SQL Server and OLAP databases installed processed, you can open SQL Server Management Studio (SSMS) 2012 and connect to the server where you installed the OLAP database. Be sure to change the connection server type to "Analysis Services" as shown in the image below. Finally, if not already open, open a New MDX query.

SQL Server Analysis Services is multi-instance, which means that you can install more than one copy on a single computer, or run new and old versions side-by-side. Any instance you install runs in one of three modes, as determined during setup: Multidimensional and Data Mining, Tabular, or SharePoint. If you want to use multiple modes, you'll need a separate instance for each one. After you install the server in a particular mode, you can use it host solutions that conform to that mode.
