## OU3PYI - DENISSE ROGERS

---

When it comes to the Autoguider market, the Lodestar has long been regarded as the cream of the crop. The creative minds at Starlight Xpress have had a tough time coming up with a way to improve on such a superb product. That changes with the introduction of the Lodestar X2, Starlight Xpress' latest guide camera with the greatest sensitivity yet.

The Starlight Xpress is a replacement autoguider cable compatible for Lodestar autoguider. It features a unique connector on the camera side. This is one of those items where it may be handy to have a spare on hand, because a faulty cable can render your autoguider inoperable.

[Starlight Xpress Lodestar X2 Colour Autoguider | First ...](#)

The original Lodestar uses the ICX429 Exview chip from Sony and offers excellent sensitivity. However, Sony have now upgraded the ICX429 to the ICX829, with considerably improved QE and read noise. This new 'Exview 2' chip approximately doubles the Lodestar sensitivity and adds nearly a full star magnitude to the minimum guide star brightness.

The Lodestar is a compact stand-alone USB2.0 guide camera featuring the large, sensitive Sony ICX429AL Exview CCD. Suitable for most mounts with a standard autoguider input. As small as a 1.25" eyepiece!

New! - 'Starlight Vision' control software for use with most SX cameras 'Starlight Live' software for use with SX mono and colour cameras. Also works with the Lodestar and Lodestar X2. Version 3.4 now available with bug fixes and more advanced support for all SX cameras and the SX filter wheel (released 16/3/19). Starlight Live for Windows

### Starlight Xpress Lodestar X2 Autoguider- Monochrome ...

Reviews & ratings: Starlight Xpress Lodestar X2 Autoguider Camera, 752x580 MFR: LODESTARX2. Accessory Type: Guiders This is the original version. It has been a very good, sensitive camera, even for dim stars in light polluted skies. I use Maxim DL for imaging and guiding, and have found that this guide camera is very flexible and reliable, even with all the various guiding modes offered within Maxim.

The Starlight Xpress Lodestar X2 Autoguider is a popular guide camera for deep-sky astrophotography. In fact, the original Lodestar was considered to be the best autoguider on the market for a long time. The X2 version is the successor to the original Starlight Xpress Lodestar autoguider and uses a Sony ICX829 Exview sensor.
