The seven primary mental abilities in Thurstone's model are verbal comprehension, verbal fluency, number facility, spatial visualization, perceptual speed, memory, and inductive reasoning (Thurstone, as cited in Sternberg, 2003).

Professor Robert Sternberg | The Psychometrics Centre

Utilizing the theme that human cognition has evolved over time as a means of adapting to our environment, Robert J. Sternberg explores the basics of cognitive psychology through coverage of cognitive neuroscience, attention and consciousness, perception, memory, knowledge representation, language, problem-solving

and creativity, decision-making and reasoning, cognitive development, and intelligence.
