### **Streams : their ecology and life (Book, 2001) [World-Cat.org]**

River ecosystems are flowing waters that drain the landscape, and include the biotic (living) interactions amongst plants, animals and micro-organisms, as well as abiotic (nonliving) physical and chemical interactions of its many parts.

Stream Ecology Ecology is the study of organisms and their dwellings. You could study forest ecology, urban ecology, or even the ecology of the Johnson's household - with their permission, of course. In all cases you are considering the interaction of the living organisms - the biota - with their nonliving environment.
