Student Exploration: Cell Structure

Explore Learning Gizmo Answer Key Cell Structure

The organelles in a cell work together to produce energy, manufacture proteins, and store genetic code. In the Cell Structure Gizmo, students learn the names and functions of cell organelles, identify organelles on a diagram of an animal or a plant cell and explain how plant cells are different from animal cells. After completing the Gizmo, teachers can ask students to discuss the following questions: Which organelle functions like a city government?
