England's school system performs below its potential and can improve significantly. This white paper outlines action designed to: tackle the weaknesses in the system; strengthen the status of teachers and teaching; reinforce the standards set by the curriculum and qualifications; give schools back the freedom to determine their own development; make schools more accountable to parents, and help them to learn more quickly and systematically from good practice elsewhere; narrow the gap in attainment between rich and poor. The quality of teachers and teaching is the most important factor in determining how well children do. The Government will continue to raise the quality of new entrants to the profession, reform initial teacher training, develop a network of "teaching schools" to lead training and development, and reduce the bureaucratic burden on schools. Teachers will be given more powers to control bad behaviour. The National Curriculum will be reviewed, specifying a tighter model of knowledge of core subjects so that the Curriculum becomes a benchmark against which school can be judged. Schools will be given more freedom and autonomy, the Academies programme extended and parents will be able to set up "Free Schools" to meet parent demand. Accountability for pupil performance is critical, and much more information will be available to aid understanding of a school's performance. School improvement will be the responsibility of schools, not central government. Funding of schools needs to be fairer and more transparent, and there will be a Pupil Premium to target resources on the most deprived pupils.

This series contains the decisions of the Court in both the English and French texts.

Borderlands migration has been the subject of considerable study, but the authorship has usually reflected a north-of-the-border perspective only. Gathering a transnational group of prominent researchers, including leading Mexican scholars whose work is not readily available in the United States and academics from US universities, Mexican Migration to the United States brings together an array of often-overlooked viewpoints, reflecting the interconnectedness of immigration policy. This collection's research, principally empirical, reveals significant aspects of labor markets, family life, and educational processes. Presenting recent data and accessible explanations of complex histories, the essays capture the evolving legal frameworks and economic implications of Mexico-US migrations at the national and municipal levels, as well as the experiences of receiving communities in the United States. The volume includes illuminating reports on populations ranging from undocumented young adults to elite Mexican women immigrants, health-care rights, Mexico's incorporation of return migration, the impact of Deferred Action for Childhood Arrivals on higher education, and the experiences of young children returning to

Mexican schools after living in the United States. Reflecting a multidisciplinary approach, the list of contributors includes anthropologists, demographers, economists, educators, policy analysts, and sociologists. Underscoring the fact that Mexican migration to the United States is unique and complex, this timely work exemplifies the cross-border collaboration crucial to the development of immigration policies that serve people in both countries.

The Pocket Book is for use by doctors nurses and other health workers who are responsible for the care of young children at the first level referral hospitals. This second edition is based on evidence from several WHO updated and published clinical guidelines. It is for use in both inpatient and outpatient care in small hospitals with basic laboratory facilities and essential medicines. In some settings these guidelines can be used in any facilities where sick children are admitted for inpatient care. The Pocket Book is one of a series of documents and tools that support the Integrated Managem.
