This study chronicles the success of the Japanese car in America. Starting with Japan's first gasoline-powered car, the Takuri, it examines early Japanese inventors and automotive conditions in Japan; the arrival of Japanese cars in California in the late 1950s; consumer and media reactions to Japanese manufacturers; what obstacles they faced; initial sales; and how the cars gained popularity through shrewd marketing. Toyota, Honda, Datsun (Nissan), Mazda, Subaru, Isuzu, and Mitsubishi are profiled individually from their origins through the present. An examination follows of the forced cooperation between American and Japanese manufacturers, the present state of the industry in America, and the possible future of this union, most importantly in the race for a more environmentally-sound vehicle.

Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever.

As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz - rich cars, poor quality. There's only one Saturn you should buy. Toyota - enough apologies: "when you mess up, 'fess up."

In the pre-Katrina boom days of 2005, executive consultant Jim Wright was dispatched to a community college in El Pequeno, a middling town located in the backwaters of Californias Central Valley. His mission: to parlay a perfunctory technology assessment stint into a lucrative long-term management contract for his firm. To Jim, experienced, wily, charismatic, the assignment seemed a piece of cake. He couldnt have been more wrong. Three years later, the boom over, his career and life in shambles, Jim sits at home in Greensboro, North Carolina, awaiting with mixed feelings the imminent visit of two former Pequeno colleagues: Mina Hussein, with whom he has remained on friendly email terms, and Grace Kirchner, once Jims fervent admirer, pet and object of forbidden desire, who mysteriously cut off contact after resigning from the college. While the two young women drive from California to North Carolina, and Jim follows their progress on Google Maps, all three are forced to revisit their memories of the fateful year they worked together, puzzling out professional challenges, political intrigues and personal entanglements, in the process exploring the conflicts between corporate logic and ethical imperatives, and coming to grips with the meaning of love.

Guide to information on ... cars and light trucks.

Canada's automotive "Dr. Phil" says there's never been a better time to buy a new car or truck. For deals on wheels, 2013 will be a "perfect storm." There's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar, a worldwide recession driving prices downward, and a more competitive Japanese auto industry that's still reeling from a series of natural disasters. In addition to lower prices and more choices, 2013 car

buyers will see more generous cash rebates, low financing rates, bargain leases, and free auto maintenance programs. Buy, sell, or hold? Which cars and trucks are "wallet-friendly" and can easily last 15 years? Which vehicles offer the most features to best accommodate senior drivers? Do ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers? Is GM's 2013 Volt electric car destined to become an electric Edsel? These questions and more are answered in this informative guide. Contains nearly 1,000 subjects categorized listing the best and worst people, places, and things.

One by one, airline passengers on their way to Georgetown from Cheddi Jagan International Airport in Guyana, were found savagely murdered. The perpetrator.... a man whose method of operation was as Neanderthal as anything Brickdam Detectives, Martin Brogan and his partner Alan Ramsamy had ever seen. From the solitary and rustic roads of Demerara, to the lavish greenery of the Corentyne backlands, the Georgetown sleuths ventured forth...along a dark and twisted trail..knowing that they were under the scope of a gruesome killer....a nemesis who was determined to stay one foot ahead in his hideous pursuit to benefit from a chilling craft.
