For many children of the sixties, the gift of a Schwinn was a ticket to freedom, a chance to feel the wind on their face and the steady rotation of rubber at their feet. The Schwinn took many through their childhood adventures, with memories filled of after school, free-range bike rides around the neighborhood with friends, the late afternoon sun shining off of the gleaming painted frame and stainless steel fenders. The 1960s and 70s saw a boom of Schwinn Sting-Rays, which appealed to young riders who had to have the hottest "muscle" bike in town, and sold like hotcakes to parents everywhere scrambling to get the best Christmas present ever for their kids. From its early years dominating the youth market with Sting-Rays to the teen-friendly Varsity and Continental models to its most recent parent-friendly iterations of the Easy-Steer and Roadster Trikes, the Schwinn weaves itself through 120 years of American history. For many, the Schwinn will be forever tied to the memories of their childhood, to a simpler time of freedom, laughter, and endless wonder. Schwinn: The Best Present Ever is a visual celebration of this American icon, with a complementary narrative throughout that tells the Schwinn story.

Secret agents, gun runners, White Russians, and con men—they all play a part in Michael B. Miller's strikingly original study of interwar France. Based on extensive research in security files and a mass of printed sources, Shanghai on the Métro shows how a distinctive milieu of spies and spy literature emerged between the two world wars, reflecting the atmosphere and concerns of these years. Miller argues that French fascination with intrigue between the wars reveals a far more assured and playful national mood than historians have hitherto discerned in the final decades of the Third Republic. But the larger history set in motion by World War I and the subsequent reading of French history into global history

are the true subjects of this work. Reconstituting through his own narratives the histories of interwar travel and adventure and the willful turning of contemporary affairs into a source of romance, Miller recovers the ambience and special qualities of the age that produced its intrigues and its tales of spies. WINNER 2019 Albertine Prize 2019 Lambda Literary Award Prix du Style Prix de la Porte Dorée 2016 Lire Best Debut Novel Le Prix du Roman News Now in B-format Paperback Kimiâ Sadr fled Iran at the age of ten in the company of her mother and sisters to join her father in France. Now twenty-five, with a new life and the prospect of a child, Kimiâ is inundated by her own memories and the stories of her ancestors, which reach her in unstoppable, uncontrollable waves. In the waiting room of a Parisian fertility clinic, generations of flamboyant Sadrs return to her, including her formidable great-grandfather Montazemolmolk, with his harem of fifty-two wives, and her parents, Darius and Sara, stalwart opponents of each regime that befalls them. In this high-spirited, kaleidoscopic story, key moments of Iranian history, politics, and culture punctuate stories of family drama and triumph. Yet it is Kimiâ herself—punk-rock aficionado, storyteller extraordinaire, a Scheherazade of our time, and above all a modern woman divided between family traditions and her own "disorientalization"—who forms the heart of this bestselling and beloved novel. "In her remarkable novel, Negar Djavadi beautifully captures the "disorientation" of exile and the attempt to reconstruct a self through family stories." - The New York Times "The novel pulsates with life but

does not shirk from violence. The gorgeous prose...takes the edge off the relentless turmoil described throughout." - The Financial Times "A momentous saga of modern Iran." - Publishers Weekly This ambitious and vivid study in six volumes explores the journey of a single, electrifying story, from its first incarnation in a medieval French poem through its prolific rebirth in the nineteenth and twentieth centuries. The Juggler of Notre Dame tells how an entertainer abandons the world to join a monastery, but is suspected of blasphemy after dancing his devotion before a statue of the Madonna in the crypt; he is saved when the statue, delighted by his skill, miraculously comes to life. Jan Ziolkowski tracks the poem from its medieval roots to its rediscovery in late nineteenth-century Paris, before its translation into English in Britain and the United States. The visual influence of the tale on Gothic revivalism and vice versa in America is carefully documented with lavish and inventive illustrations, and Ziolkowski concludes with an examination of the explosion of interest in The Juggler of Notre Dame in the twentieth century and its place in mass culture today. Volume 2: Medieval Meets Medievalism deals with the influence of the tale in nineteenth- and early-twentieth-century Europe and America, and the development of literary medievalism at this time. The Juggler of Notre Dame and the Medievalizing of Modernity is a rich case study for the reception of the Middle Ages in modernity. Spanning centuries and continents, the medieval period is understood through the lens of its (post)modern reception in Europe and America. Profound connections between the verbal and the visual are illustrated by a rich trove of images, including book illustrations, stained glass, postage stamps, architecture, and Christmas cards. Presented with great clarity and simplicity, Ziolkowski's work is accessible to the general reader, while its many new discoveries will be valuable to academics in such fields and disciplines as medieval studies, medievalism, philology, literary history,

art history, folklore, performance studies, and reception studies.

In this epic conclusion to *The Girl King*, two sisters war for a crown that was never meant to be theirs - though only one can wear it. As the late-Emperor's first-born, Princess Lu knows the throne rightfully belongs to her. She also can't forget her promise to shapeshifter Nok, the boy she loves, to win justice for his now powerless people. Yet even with an army at her side, Lu must face a major obstacle: the current Empress, her younger sister, Min. Princess Min used to live in Lu's shadow. Now she wields an ancient magic, one she's determined to use to forge her own path for the Empire, even if that means making enemies in court. But first, she must learn to control her power - before it consumes her . . . and the entire realm. Lu and Min are set for an epic confrontation, but the Empire faces a threat even greater than their rivalry. One that could cost them both the throne - and their lives. Praise for *The Girl King*: 'Everything I want in a high fantasy' Samantha Shannon, Sunday Times bestselling author 'Mimi Yu has that gift of magic' Marjorie Liu, New York Times bestselling author 'If you're down with dangerous magic, clans of shapeshifters, and worthy girls who somehow STILL need to prove their worth, then you will love this as much as I did' Kendare Blake, New York Times bestselling author

In the first meeting of the Relief Society, Sister Emma Smith said, "We are going to do something extraordinary." She was right. The history of Relief Society is filled with examples of ordinary women who have accomplished extraordinary things as they have exercised faith in Heavenly Father and Jesus Christ. Relief Society was established to help prepare daughters of God for the blessings of eternal life. The purposes of Relief Society are to increase faith and personal righteousness, strengthen families and homes, and provide relief by seeking out and helping those in need. Women fulfill these purposes as they seek, receive, and act on personal revelation in their callings and in their personal lives. This book is not a chronological history, nor is it an attempt to provide a comprehensive view of all that the Relief Society has accomplished. Instead, it provides a historical view of the grand scope of the work of the Relief Society. Through historical accounts, personal experiences, scriptures, and words of latter-day prophets and Relief Society leaders, this book teaches about the responsibilities and opportunities Latter-day Saint women are given in Heavenly Father's plan of happiness.

Before the dust settles, as many as 100,000 natural gas wells may be drilled into the Marcellus Shale on more than 20,000 well pads in Pennsylvania. Living on seven acres above the shale, Jimmy Guignard tells his story as an English professor grappling with the meaning of place and the power of words as he watches the rural landscape his family calls home be transformed into an industrial sacrifice zone. From the vantage point of an avid and experienced cyclist, Guignard tracks the takeover, chalking up thousands of miles pedaling through Tioga and surrounding counties. Encountering increased truck traffic on the roads, crossing pipeline construction on the trails, and passing a growing number of flaring gas wells, the author's rides begin to shape his academic work in ways he found surprising and sobering. Juggling his roles as disinterested professor, anxious father and citizen, and reluctant activist, he reveals how the rhetoric of industry, politicians, and locals reshaped his understanding of teaching and his faith in the force of language.

From shifters to derailleurs, pedals to handlebars, this book covers every component of a road bike, lists the tools bike owners need to tackle simple and advanced projects, and demonstrates with 295 detailed illustrations how to work on each part.

A nearly \$19 trillion debt. A 74,608-page tax code. An increase in global temperatures. A broken Social Security system. These are just some of the problems plaguing our nation. While politicians are quick to offer lip service, they are slow -- or non-existent -- with solutions. Americans are frustrated with the lack of leadership as evidenced by Congress' 10 percent approval rating. Now is the time for simple, bold changes that will alter the direction of this nation. Drawing on more than three decades of business experience, John Burke applies his tested problems-and-solutions approach and independent thinking to tackle the complex problems that America faces. In *12 Simple Solutions to Save America*, Burke proposes concrete solutions to fix these issues and challenges Americans to resist the status quo and change what elected officials are unwilling or unable to change. Americans have a civic duty to make the tough decisions that improve the lives of citizens over the long-term. It can be done, but it will not happen by accident.

Book 5 of *The Marketplace Series* by Laura Antoniou. In previous books in the Marketplace series, readers have gone behind the scenes at a slave auction, an owner's home, a trainer's house, and even the ephemeral world of the annual trainers' Academy. In *-The Reunion-* we visit a vacation resort for a Marketplace -family-gathering, where slaves, former slaves, trainers, and their spouses, significant others and family members can relax, let their hair down, and connect with each other. But the *-reunion-* that matters most is that of Robin Cassidy (the slave from *-The Slave-*) and her first trainer, Chris Parker (the trainer from *-The Trainer-*). Of course the vacation resort isn't just any resort, it's Kaleigh Castle, a centuries-old Irish castle that is now a luxury hotel and happens to be where Chris learned many of the skills and practices that have made him so sought-after in the Marketplace. And while ev-

everyone enjoys their two most favorite indoor sports--gossip and sex--trouble is afoot. A nosy tabloid reporter thinks he's onto something: a real-life international slave trading ring. Can Chris keep the world from learning the truth about The Marketplace, but accept the truth about his feelings regarding Robin, Anderson, and Jiro at the same time? About the author: Laura Antoniou is the award-winning author of The Marketplace Series, The Killer Wore Leather, The Catalyst, and other works of BDSM and alternative sexuality, as well as the editor of Leatherwomen and No Safe-words: Tales from the Marketplace. In 2001 she was awarded the John Preston Short Story award, given annually by the National Leather Association for the best BDSM fiction.

In recent years, the emerging field of museum studies has seen rapid expansion in the critical study of museums and scholars started to question the institution and its functions. To contribute differentiated viewpoints to the currently evolving meta-discourse on the museum, this volume aims to investigate how the institution of the museum has been visualized and translated into different kinds of images and how these images have affected our perception of these institutions. In this interdisciplinary collection, scholars from a variety of academic backgrounds, including art history, heritage, museums studies and architectural history, explore a broad range of case studies stretching across the globe. The volume opens up debate about the epistemological and historiographical significance of a variety of different images and representations of the Art Museum, including the transformation or adaptation of the image of the art museum across periods and cultures. In this context, this volume aims to develop a new theoretical framework while proposing new methodological tools and resources for the analysis of museological representations on a global scale.

"And sometime, at some point, do something for your country." That quote from Pulitzer Prize-winning historian David McCullough resonated so deeply with Trek Bicycle President John Burke that he set out to write a book laying out his vision for the country, an America that can once again be a shining city on a hill. Burke says it's time to cut through the political fog and deal with the facts: The U.S. is facing serious, long-term problems, and politicians in Washington, D.C. are ignoring them. These critical issues can be resolved, he says, with the determination and shared sacrifice of the American people. From battling climate change to saving Social Security, from reducing the risk of nuclear war to rebuilding crumbling roads and bridges, from campaign finance reform to improving the health of Americans, John Burke offers his 16 Nonpartisan Solutions for putting the United States on a stronger foundation. This is his Presidential Playbook, a plan for America's future--and a call for all Americans to come together and ... do something for our country.

Sketching User Experiences approaches design and design thinking as something distinct that needs to be better understood—by both designers and the people with whom they need to work— in order to achieve success with new products and systems. So while the focus is on design, the approach is holistic. Hence, the book speaks to designers, usability specialists, the HCI communi-

ty, product managers, and business executives. There is an emphasis on balancing the back-end concern with usability and engineering excellence (getting the design right) with an up-front investment in sketching and ideation (getting the right design). Overall, the objective is to build the notion of informed design: molding emerging technology into a form that serves our society and reflects its values. Grounded in both practice and scientific research, Bill Buxton's engaging work aims to spark the imagination while encouraging the use of new techniques, breathing new life into user experience design. Covers sketching and early prototyping design methods suitable for dynamic product capabilities: cell phones that communicate with each other and other embedded systems, "smart" appliances, and things you only imagine in your dreams Thorough coverage of the design sketching method which helps easily build experience prototypes—without the effort of engineering prototypes which are difficult to abandon Reaches out to a range of designers, including user interface designers, industrial designers, software engineers, usability engineers, product managers, and others Full of case studies, examples, exercises, and projects, and access to video clips that demonstrate the principles and methods

The Race Across America (RAAM) is a nonstop, 3,000-mile bicycle race with a twelve-day limit. The race course traverses deserts and mountains in all kinds of conditions including extreme temperatures, wind, rain, and fog. Racers typically sleep less than four hours per day. The Race Across America is the toughest ultracycling race in the world. It requires physical and mental toughness, but also organization, planning, and an efficient, dedicated, well-trained crew. "One Million Pedal Strokes" tells the story of how rookie Keith Wolcott completed RAAM in 2014, with his wife Ellen as his crew chief. It gives racer, crew chief, and crew perspectives of the race. It contains details about planning and details about decisions that must be made, with sections on potential problems, strategy, training, the mental aspect, a goal pace, crew training, nutrition, clothing, equipment, and recovery---all aimed to be useful for prospective RAAM racers.

Hunter Allen and Andy Coggan, PhD have completely revised the book that made power meters understandable for amateur and professional cyclists and triathletes. Power meters have become essential tools for competitive cyclists and triathletes. No training tool can unlock as much speed and endurance as a power meter---

for those who understand how to interpret their data. A power meter displays and records exactly how much energy a cyclist expends, which lends unprecedented insight into that rider's abilities and fitness. With the proper baseline data, a cyclist can use a power meter to determine race strategy, pacing, and tactics. Training and Racing with a Power Meter makes it possible to exploit the incredible usefulness of the power meter by explaining how to profile strengths and weaknesses, measure fitness and fatigue, optimize workouts, time race readiness, and race using power. This new edition: Enables athletes to predict future performance and time peak form Introduces fatigue profiling, a new testing method to pinpoint weaknesses Includes two training plans to raise functional threshold power and time peaks for race day Offers 75 power-based workouts tuned for specific training goals This updated edition also includes new case studies, a full chapter on triathlon training and racing, and improved 2-color charts and tables throughout. Training and Racing with a Power Meter, will continue to be the definitive guide to the most important training tool ever developed for endurance sports.

The son of the late founder of Trek Bicycle Corporation, one of the leading bicycle companies in the world, reveals his father's life story and the ways in which he was an inspiring businessman and leader.

Controversies in politics arise from many sources, but the conflicts that endure for generations or centuries show a remarkably consistent pattern. In this classic work, Thomas Sowell analyzes this pattern. He describes the two competing visions that

shape our debates about the nature of reason, justice, equality, and power: the "constrained" vision, which sees human nature as unchanging and selfish, and the "unconstrained" vision, in which human nature is malleable and perfectible. A Conflict of Visions offers a convincing case that ethical and policy disputes circle around the disparity between both outlooks.

Bicycling magazine features bikes, bike gear, equipment reviews, training plans, bike maintenance how tos, and more, for cyclists of all levels.

Despite being a universal experience, eating occurs with remarkable variety across time and place: not only do we not eat the same things, but the related technologies, rituals, and even the timing are in constant flux. This lively and innovative history paints a fresco of the Italian nation by looking at its storied relationship to food.

In this revised and expanded edition, leading forensic scientist John Trestrail offers a pioneering survey of all that is known about the use of poison as a weapon in murder. Topics range from the use of poisons in history and literature to convicting the poisoner in court, and include a review of the different types of poisons, techniques for crime scene investigation, and the critical essentials of the forensic autopsy. The author updates what is currently known about poisoners in general and their victims. The Appendix has been updated to include the more commonly used poisons, as well as the use of antifreeze as a poison.

User Experience Re-Mastered: Your Guide to Getting the Right Design provides an understanding of key design and development processes aimed at enhancing the user experience of websites and web applications. The book is organized into four parts. Part 1 deals with the concept of usability, covering user needs analysis and card sorting—a tool for shaping information architecture in websites and software applications. Part 2 focuses on idea generation processes, including brainstorming; sketching; persona development; and the use of prototypes to validate and extract assumptions and requirements that exist among the product team. Part 3 presents core design principles and guidelines for website creation, along with tips and examples on how to apply these principles and guidelines. Part 4 on evaluation and analysis discusses the roles, procedures, and documents needed for an evaluation

session; guidelines for planning and conducting a usability test; the analysis and interpretation of data from evaluation sessions; and user interface inspection using heuristic evaluation and other inspection methods. \*A guided, hands-on tour through the process of creating the ultimate user experience - from testing, to prototyping, to design, to evaluation \*Provides tried and tested material from best sellers in Morgan Kaufmann's Series in Interactive Technologies, including leaders in the field such as Bill Buxton and Jakob Nielsen \*Features never before seen material from Chauncey Wilson's forthcoming, and highly anticipated Handbook for User Centered Design

This is the complete reference guide to bike servicing and repair, and an essential bible for every cyclist's bookshelf. The vitreous body long has been the most mysterious of all ocular structures, owing perhaps to its seeming simplicity. There have been few concerted, sustained efforts to unravel the mysteries of how vitreous is composed and what role it plays in normal physiology as well as pathology. Over the years, however, many studies have produced important findings concerning vitreous biochemistry, structure, physiology, and pathobiology. Published on the 25th anniversary of Sebag's first book on Vitreous, this second installment is nearly five times longer than its predecessor, reflecting how much has been learned in the past quarter century. This well-constructed compendium not only addresses the most current scientific knowledge, but also reviews clinical perspectives in a manner that lends richness to the scope of the book. Written by 90 authors, this book has 56 chapters organized into 7 sections: Biochemistry; Anatomy, Development, and Aging; Pathology/Pathobiology; Physiology and Pharmacotherapy; Posterior Vitre-

o-Retinal Surgery; Peripheral Vitreo-Retinal Surgery; and Pharmacologic Vitreolysis. With a foreword by Coleman & Lincoff and an introduction by Wallace Foulds, Sebag's latest tome on vitreous is destined to be the authoritative text for years to come.

Coach Joe Friel is the most trusted name in endurance sports coaching, and his Cyclist's Training Bible is the most comprehensive and reliable training resource ever written for cyclists. This new edition of the bestselling book includes all of the latest advances in training and technology. Using this book, cyclists can create a comprehensive, self-coached training plan that is both scientifically proven and shaped around their personal goals. Friel empowers athletes with every detail they need to consider when planning a season, lining up a week of workouts, or preparing to race. This fourth edition includes extensive revisions on the specifics of how to train and what to eat. Friel explains how cyclists can: best gauge intensity with power meters and other new training technology to maximize form and fitness and reduce fatigue; more knowledgeably and accurately make changes to their annu-

al training plan over the course of a season; dramatically build muscular endurance with strength training; improve body composition and recovery with smarter nutrition. With more case studies to draw from and multiple contingency plans for those times when training doesn't progress as planned, The Cyclist's Training Bible continues to be the definitive guide to optimal cycling performance.
