G9FWDS - BLAKE COLLINS

A brilliant probe into the political and psychological effects of our changing relationship with social media. Former social media executives tell us that the system is an addiction-machine. We are users, waiting for our next hit as we like, comment and share. We write to the machine as individuals, but it responds by aggregating our fantasies, desires and frailties into data, and returning them to us as a commodity experience. The Twittering Machine is an unflinching view into the calamities of digital life: the circus of online trolling, flourishing alt-right subcultures, pervasive corporate surveillance, and the virtual data mines of Facebook and Google where we spend considerable portions of our free time. In this polemical tour de force, Richard Seymour shows how the digital world is

changing the ways we speak, write, and think. Through journalism, psychoanalytic reflection and insights from users, developers, security experts and others, Seymour probes the human side of the machine, asking what we're getting out of it, and what we're getting into. Social media held out the promise that we could make our own history—to what extent did we choose the nightmare that it has become?

First multi-year cumulation covers six years: 1965-70.

In this richly documented work, Serge Courville tells the geographical history of Quebec from the appearance of the first humans through to the present day. This detailed and erudite book maps major stages of Quebec's development, providing a geographical record of the many social relationships that over time created a sense of place. Lands-

cape, Courville shows, is the keeper of memory, the record of successive changes, and a witness to the genesis of the new. Places that were once agricultural, then left to waste and ruin, are today re-vivified by tourism. Areas that now house office buildings were long ago open playgrounds where children ruled. Drawing on vast research, Courville shows how, in spite of the turbulence Quebec often endures ♦ or perhaps because of it ♦ the land itself may be seen as an important participant in the history of its peoples. Quebec: A Historical Geography was originally published by Les Presses de l'Université ♦ Laval as Le Québec: Geneses et mutations du territoire.

Le document d'orientation vise à aider les Parties à atténuer plus efficacement les effets d'éventuels accidents industriels et leurs conséquences sur la santé humaine, l'environnement et le patrimoine culturel au sein de ces pays et au-

delà de leurs frontières. Pour ce faire, le document d'orientation général (Partie A) partage des exemples et en soulignant les bonnes pratiques des pays de la région de la CEE afin d'intégrer les considérations de sécurité industrielle dans leur processus d'évaluation environnementale et de planification de l'aménagement du territoire. Il souligne également les interconnexions, synergies et complémentarités importantes entre ces instruments et d'autres, notamment la Convention CEE sur l'accès à l'information, la participation du public au processus décisionnel et l'accès à la justice en matière environnementale (Convention d'Aarhus) dans l'application des dispositions. Ceci est complété par des conseils techniques (partie B), qui mettent l'accent sur les aspects du risque.

This 1992 book is a study of the 'confetti of empire', the former French colonies that remain part of France.

The UNCTAD Handbook of Statistics provides a comprehensive, reliable, coherent and comparable collection of statistical data relevant to the analysis of international trade, investment and development for individual countries, geographical regions and for selected economic groupings. The publication presents consolidated reference statistics considered of particu-

lar importance for describing how developing countries have evolved in the context of globalization for the following subjects: International merchandise trade, exports and imports structure by products and by regions of origin and destination, and related concentration and diversification indices; volume and unit value indices of exports and imports, terms of trade and purchasing power indices of exports; applied import tariff rates; international trade in services, exports and imports of services by service categories; world merchant fleet; commodity free-market prices and price indices; international financial data: current account net of balance of payments, foreign direct investment, migrants' remittances, and indicators of development: gross domestic product, and population. The printed edition of the Handbook is a tool for research, policy making and education, which can also be used in conjunction with the DVD which contains the full time series of data. The

DVD presents figures for more economic groupings than the printed version, as well as figures for trade and interregional groups.

This book provides significant new insights into the Enlightenment in Portugal and its relationships with other European cultural movements using Eugénio dos Santos (1711-1760) as a common reference point. Eugénio dos Santos was a Portuguese architect and city planner who, among other projects, was responsible for the plans to rebuild Lisbon after the earthquake of 1st November 1755. His artistic and technical training, architectural production, aesthetic preferences and some of the books in his private library point to a person who embodied the transition between two moments in Portuguese culture, with their specific characteristics and particular reception of the practices and ideas that circulated among European intellectuals and practitioners. Over the 18 chapters of this volume, several specialists in different disciplinary areas discuss

ideas, libraries, printed and handwritten documents, drawings, printing techniques, and architects, philosophers and writers of the 18th century, in order to offer a broad view of a time period closely associated with the construction of modernity.

Reprint of the eighth and last edition. Along with William Kent, Joseph Story [1779-1845] shares the distinction of having had the greatest influence on American law during the nineteenth century. Marvin considers Story's Conflict of Laws to be the first systematic work on the subject. Story collected material from all available sources, and systematized it in a manner useful to all practitioners. "No work on international jurisprudence merited, nor received, greater praise from the jurists of Europe. It impressed English lawyers with the highest respect for the extensive learning of Mr. Justice Story.": Marvin, Legal Bibliography (1847) 670-671.
