Highly Commended at the Society of Authors and Royal Society of Medicine Medical Book Awards 2006 This outstanding atlas of ophthalmic pathology brings together the world famous collection of digital images from the Tennant Eye Institute in Glasgow. Weng Sehu and William Lee have produced a unique body of information, moulding Ophthalmic Pathology and the accompanying interactive CD-Rom into the essential 'must-have' revision aid and

reference book for ophthalmologists in training, teachers and clinical ophthalmologists worldwide. Ophthalmic Pathology is a concise, yet informative, user friendly textbook whose unparalleled image collection will more than meet the expectations of the ophthalmological community.

Featuring more than 800 high-quality, modern images, Lippincott® Atlas of Anatomy is a vibrantly colored regional atlas of human anatomy offering an unprecedented combination of visual aesthetic appeal and

anatomical accuracy. A unique art style featuring bright colors, color coding of anatomical elements, judicious use of labeling, and no extraneous text make this book an ideal tool for students. Each plate teaches specific structures and relationships—displayed using artistic techniques such as 'ghosting,' layering, and color coding—providing clear focus on important structures and resulting in easier and faster comprehension. This unique pedagogy, in combination with the beautiful art

style, make this anatomy atlas the preferred choice for teaching and learning. This updated new edition enhances students' understanding of anatomical structures and relationships with many new and modified illustrations, new muscle tables, and convenient online access to tables summarizing key information for multiple anatomical structures. Packaged with the atlas is an interactive eBook version with all of the images, including fully searchable legends and labels and 'zoom and compare' features, as well as online labeling exercises that reinforce students' understanding of newly learned concepts and structures.

Packed with 65 sample cases covering all core topics, *Ophthalmology Oral Board Review* is an image-based case review designed to help you prepare—and succeed—on the American Board of Ophthalmology oral board certification exam. Master the LPN/LVN's role and responsibilities in medical-surgical nursing! With coverage organized by body systems, *Adult Health Nursing, 9th Edition* provides an essential guide to nursing care for patients with common disorders. Through use of the nursing process, you will develop clinical judgment skills to assess patient needs, develop nursing care plans, and plan effective nursing interventions. Case studies provide practice with critical thinking and clinical judgment, and new Next Generation NCLEX®-format questions help you apply theory to practice. Written by nursing educators Kim Cooper and Kelly Gosnell, this text also helps you prepare for success on the NCLEX-PN® examination. Step-by-step instructions for skills show clearly defined nursing actions along with the rationales for each. Overview of

Anatomy and Physiology begins each body systems chapter, and the Introduction to Anatomy and Physiology chapter provides a clear, basic understanding of the A&P that LPN/LVNs need to know. The nursing process is applied to the discussion of disorders, and is summarized at the end of each chapter. Nursing care plans use a case-study format to emphasize patient goals and outcomes, and include critical thinking questions at the end of each care plan. Evidence-Based Practice boxes provide synopses of research articles that apply to nursing, along with nursing implications for the LPN/LVN. Safety Alert! boxes cover issues related to safe patient care in a variety of settings. Coordinated Care boxes promote comprehensive patient care with other members of the health care team, focusing on prioritization, assignment, supervision, collaboration, delegation, and leadership topics. Lifespan Considerations boxes provide age-specific information for the care of the patient. Older Adult Considerations boxes provide age-specific information for the care of the aging population, which is often the primary focus of the LPN/LVN nurse. Communication boxes illustrate communication strate-

gies through real-life examples of nurse-patient dialogue. Patient Teaching boxes focus on three-way communication among the nurse, patient, and family members, and include topics such as hospital discharge instructions. Health Promotion Considerations boxes highlight information on wellness and disease prevention, including infection control, diet, and pregnancy. Home Health Considerations boxes discuss issues facing patients and their caregivers in the home setting. Medication tables provide quick access to action, dosage, precautions, and nursing considerations for commonly used drugs. Get Ready for the NCLEX® Examination sections provide key points, review questions, and critical thinking activities to reinforce learning.

The case study format used in Case Reviews in Ophthalmology, 2nd Edition has been proven to be a highly effective way to incorporate medical knowledge with clinical judgment – resulting in the best possible results on practical exams. More than 140 relevant cases cover every aspect of the field: optics/refraction; neuro-ophthalmology/orbit; pediatrics/strabismus; external disease/adnexa; anterior segment; and posterior segment. Large photos highlight each case, enhancing your knowledge and reinforcing key aspects of diagnosis. Seasoned authors Neil J. Friedman and Peter K. Kaiser provide the exact guidance you need to assess, reinforce, and broaden your mastery of every essential concept in ophthalmology for clinical rounds, oral boards, or recertification. Clear clinical photos, scans and histological images used throughout to help improve diagnostic precision and draw attention to the intricacies of each disease. A consistent presentation style features one or two case photos and questions on one page, with answers and

discussion on the following page. Expanded to include 30 all-new cases bringing the total to more than 140 illustrated scenarios.

The Clinical Ophthalmology Test-Yourself Atlas new edition is a more valuable aid to examination success than ever before. The topics covered have been expanded, and extra images and questions have been added throughout. The book has been completely redesigned and re-formatted to be more user-friendly, and it now provides a handy reference and revision guide that can be conveniently referred to at any time. A new online website presents all the questions and images in varied formats so you can interactively assess all aspects of your knowledge by the most effective means possible. You can work through questions thematically using the 'in the classroom' mode, or alternatively choose the random 'in the clinic' mode that mimics the arbitrary presentation of cases in clinical practice. With its variety, flexibility and instant feedback, the online self-assessment tool provides a thorough, challenging and stimulating way for students to review and consolidate their knowledge. Online assessment presents all questions

and images in interactive format. Two modes of assessment test all aspects of your knowledge with instant results. Redesigned with new format and handy trim size. Over 1000 colour illustrations, many of which are new. More questions, more pathology, more histology.

Eye Pathology: An Atlas and Text is a basic introduction to eye pathology that can be read and mastered during an ophthalmic pathology rotation. In addition, it will serve as a well-illustrated resource for residents who are studying for the OKAP examinations or Board certification in ophthalmology. Completely written and illustrated by Dr. Eagle, this single-author text is primarily designed for ophthalmology residents and the comprehensive ophthalmologist not looking for a comprehensive text on the subject.

Producing quality fundus photographs requires more than just a camera; it also calls for substantial knowledge and skill. Perfect for non-expert ophthalmic professionals, this new resource provides step-by-step guidance for producing high-quality retinal images. With over 225 full-color illustrations, it covers every aspect of reti-

nal, fundus, and digital imaging. Provides only "need to know" information omitting coverage pertinent only to certified retinal photographers. Explains how to produce sharp retinal photographs with a traditional or non-mydratic camera. Describes how to effectively capture, process, and output digital images. Features hundreds of color illustrations, tables, and boxes that show how to proceed and demonstrate the difference that proper technique can make.
