Philip H. J. Davies is one of a growing number of British academic scholars of intelligence, but the only academic to approach the subject in terms of political science rather than history. He wrote his PhD at the University of Reading on the topic 'Organisational Development of Britain's Secret Intelligence Service 1909-1979', and has published extensively on intelligence and defence issues. After completing his PhD he taught for a year and a half on the University of London external degree programme in Singapore before returning to the UK to lecture at the University of Reading for two years. He was formerly Associate Professor of International and Security Studies at the University of Malaya in Malaysia where he not only conducted his research but provided a range of training and consultancy services to the Malaysian intelligence and foreign services. He is now based at Brunel University, UK

Differently Morphous is the latest and greatest tale to emerge from the mind of writer Yahtzee Croshaw (Mogworld, Jam, Will Save the Galaxy for Food). A magical serial killer is on the loose, and gelatinous, otherworldly creatures are infesting the English countryside. Which is making life for the Ministry of Occultism difficult, because magic is supposed to be their best kept secret. After cen-

turies in the shadows, the Ministry is forced to unmask, exposing the country's magical history--and magical citizens--to a brave new world of social media, government scrutiny, and public relations. On the trail of the killer are the Ministry's top agents: a junior operative with a photographic memory (and not much else), a couple of overgrown schoolboys with godlike powers, and a demonstrably insane magician. But as they struggle for results, their superiors at HQ must face the greatest threat the Ministry has ever known: the forces of political correctness . . .

The Art of Losing is a compelling debut that explores issues of addiction, sisterhood, and loss. On one terrible night, 17-year-old Harley Langston's life changes forever. At a party she discovers her boyfriend, Mike, hooking up with her younger sister, Audrey. Furious, she abandons them both. When Mike drunkenly attempts to drive Audrey home, he crashes and Audrey ends up in a coma. Now Harley is left with guilt, grief, pain and the undeniable truth that her now ex-boyfriend has a drinking problem. So it's a surprise that she finds herself reconnecting with Raf, a neighbor and childhood friend who's recently out of rehab and still wrestling with his own demons. At first Harley doesn't want to get too close to him. But as her sister slowly recovers, Harley begins to see a path forward with Raf's help that she never would have believed possible—one guided by honesty, forgiveness, and redemption.

Potential royal bride America is confused about her feelings for both Prince Maxon and childhood sweetheart Aspen as she gets nearer to the finals of The Selection.

'Brash, open, calculating and self-serving, Gen. Pervez Musharraf was probably the twenty-first century's first dictator. Murtaza Razvi gives us a fascinating first cut of his history. He provides a balanced picture of the general's achievements, contradictions and vulnerabilities.'-Manoj Joshi, author, *Lost Rebellion: Kashmir in the 1990s* Musharraf: The Years in Power charts the rise and fall of General Pervez Musharraf, Pakistan's most controversial leader since Zulfikar Ali Bhutto. Musharraf's life in the hot seat of Pakistan's politics is a rollercoaster tale of a soldier-turned-politician, a commando, a self-styled statesman, a sophisticated globetrotter, the resolute face of the US-led global war on terror, and the feared, revered and finally disowned president of an Islamic republic, who is smitten with an 'enlightened moderation' that succumbs, in the end, to the many contradictions within the man himself. This no-holds-barred political biography by an astute political commentator and journalist provides perspective on the man whose politics have changed the face of the Indian subcontinent.

THE SELECTION changed the lives of thirty-five girls forever. Now, only one will claim Prince Maxon's heart... It's swoon meets the Hunger Games in the third instalment of THE SELECTION series!

This book aims to offer a thorough study and reference textbook on electrical machines and drives. The basic idea is to start from the pure electromagnetic principles to derive the equivalent circuits and steady-state equations of the most common electrical machines (in the first parts). Although the book mainly concentrates on rotating field machines, the first two chapters are devoted to transformers and DC commutator machines. The chapter on transformers is included as an introduction to induction and synchronous machines, their electromagnetics and equivalent circuits. Chapters three and four offer an in-depth study of induction and synchronous machines, respectively. Starting from their electromagnetics, steady-state equations and equivalent circuits are derived, from which their basic properties can be deduced. The second part discusses the main power-electronic supplies for electrical drives, for example rectifiers, choppers, cycloconverters and inverters. Much attention is

paid to PWM techniques for inverters and the resulting harmonic content in the output waveform. In the third part, electrical drives are discussed, combining the traditional (rotating field and DC commutator) electrical machines treated in the first part and the power electronics of part two. Field orientation of induction and synchronous machines are discussed in detail, as well as direct torque control. In addition, also switched reluctance machines and stepping motors are discussed in the last chapters. Finally, part 4 is devoted to the dynamics of traditional electrical machines. Also for the dynamics of induction and synchronous machine drives, the electromagnetics are used as the starting point to derive the dynamic models. Throughout part 4, much attention is paid to the derivation of analytical models. But, of course, the basic dynamic properties and probable causes of instability of induction and synchronous machine drives are discussed in detail as well, with the derived models for stability in the small as starting point. In addition to the study of the stability in the small, a chapter is devoted to large-scale dynamics as well (e.g. sudden short-circuit of synchronous machines). The textbook is used as the course text for the Bachelor's and Master's programme in electrical and mechanical engineering at the Faculty of Engineering and Architecture of Ghent University. Parts 1 and 2 are taught in the basic course 'Fundamentals of Electric Drives' in the third bachelor. Part 3 is used for the course 'Controlled Electrical Drives' in the first master, while Part 4 is used in the specialised master on electrical energy.
