THE SELECTION changed the lives of thirty-five girls forever. Now, only one will claim Prince Maxon's heart... It's swoon meets the Hunger Games in the third instalment of THE SELECTION series!

In 1559 England, Meg, an orphaned thief, is pressed into service and trained as a member of the Maids of Honor, Queen Elizabeth I's secret all-female guard, but her loyalty is tested when she falls in love with a Spanish courtier who may be a threat.

This book aims to offer a thorough study and reference textbook on electrical machines and drives. The basic idea is to start from the pure electromagnetic principles to derive the equivalent circuits and steady-state equations of the most common electrical machines (in the first parts). Although the book mainly concentrates on rotating field machines, the first two chapters are devoted to transformers and DC commutator machines. The chapter on transformers is included as an introduction to induction and synchronous machines, their electromagnetics and equivalent circuits. Chapters three and four offer an in-depth study of induction and synchronous machines, respectively. Starting from their electromagnetics, steady-state equations and equivalent circuits are derived, from which their basic properties can be deduced. The second part discusses the main power-electronic supplies for electrical drives, for example rectifiers, choppers, cycloconverters and inverters. Much attention is paid to PWM techniques for inverters and the resulting harmonic content in the output waveform. In the third part, electrical drives are discussed, combining the traditional (rotating field and DC commutator) electrical machines treated in the first part and the power electronics of part two. Field orientation of induction and synchronous machines are discussed in detail, as well as direct torque control. In addition, also switched reluctance machines and stepping motors are discussed in the last chapters. Finally, part 4 is devoted to the dynamics of traditional electrical machines. Also for the dynamics of induction and synchronous machine drives, the electromagnetics are used as the starting point to derive the dynamic models. Throughout part 4, much attention is paid

to the derivation of analytical models. But, of course, the basic dynamic properties and probable causes of instability of induction and synchronous machine drives are discussed in detail as well, with the derived models for stability in the small as starting point. In addition to the study of the stability in the small, a chapter is devoted to large-scale dynamics as well (e.g. sudden short-circuit of synchronous machines). The textbook is used as the course text for the Bachelor's and Master's programme in electrical and mechanical engineering at the Faculty of Engineering and Architecture of Ghent University. Parts 1 and 2 are taught in the basic course 'Fundamentals of Electric Drives' in the third bachelor. Part 3 is used for the course 'Controlled Electrical Drives' in the first master, while Part 4 is used in the specialised master on electrical energy.

The Art of Losing is a compelling debut that explores issues of addiction, sisterhood, and loss. On one terrible night, 17-year-old Harley Langston's life changes forever. At a party she discovers her boyfriend, Mike, hooking up with her younger sister, Audrey. Furious, she abandons them both. When Mike drunkenly attempts to drive Audrey home, he crashes

and Audrey ends up in a coma. Now Harley is left with guilt, grief, pain and the undeniable truth that her now ex-boyfriend has a drinking problem. So it's a surprise that she finds herself reconnecting with Raf, a neighbor and childhood friend who's recently out of rehab and still wrestling with his own demons. At first Harley doesn't want to get too close to him. But as her sister slowly recovers, Harley begins to see a path forward with Raf's help that she never would have believed possible—one guided by honesty, forgiveness, and redemption.

Magnus Chase has seen his share of trouble. Ever since that terrible night two years ago when his mother told him to run, he has lived alone on the streets of Boston, surviving by his wits, staying one step ahead of the police and truant officers. On

"After being swept up in the magical world of Caraval, Donatella Dragna has finally escaped her father and saved her sister, Scarlett, from a disastrous arranged marriage. The girls should be celebrating, but Tella isn't yet free. She made a desperate bargain with a mysterious criminal, and what Tella owes him no one has ever been able to deliver: Caraval Master Legend's true name. The only chance of uncovering Legend's identity is to win Caraval, so Tel-

la throws herself into the legendary competition once more -- and into the path of the murderous heir to the throne, a doomed love story, and a web of secrets ... including her sister's. Caraval has always demanded bravery, cunning, and sacrifice. But now the game is asking for more. If Tella can't fulfill her bargain and deliver Legend's name, she'll lose everything she cares about -- maybe even her life. But if she wins, Legend and Caraval will be destroyed forever."--Publisher's website.
