By analysing decades of research and running thousands of original experiments on herself wearing a continuous glucose monitor, she has distilled 10 simple and surprising hacks that can be easily incorporated into everyday life. By the end of this book, you'll be aware of how food

impacts your biology. You'll know which breakfast choices may be causing your cravings, in which order you should eat the food on your plate, what not to do on an empty stomach, which foods lead to mood swings, and how to avoid being sleepy at 3pm.
