The Flora & Fauna in Rajasthan is sparse as expected in the desert land. Most of the forest is of dry deciduous type. It has a small range of slow-growing thorny trees, shrubs and grasses that has adapted itself to the harsh conditions. Most commonly found tree species are the ubiquitous khejri (*Prosopis cineraria*) and various types of acacia.

Desert Flora in Rajasthan - Rajasthan Tourism

The harsh landscape of the Thar Desert supports a surprisingly large number of hardy, drought-resistant plant species. These plants have adapted to the desert conditions of sandy soil, scarce water and long hours of strong sunlight.
