The Futurological Congress is one of the best sci-fi books I've ever read. It's also one of the more interesting books I've read this year in terms of both its structure and plot. In terms of structure, the book opens with non-stop action and excitement, every single page, and this doesn't stop until about 70 pages in.

The Futurological Congress follows one of the adventures of character Ijon Tichy as he is caught up in a chemical attack. The book provides satire on both the social move towards a "chemically corrected society" where we use different drugs to fix any kind of problem we encounter, and a more subtle commentary on Lem's perception of the idiocy and deceit of government.
