Industrial Revolution. Mechanized textile production spread from Great Britain to continental Europe and the United States in the early 19th century, with important centres of textiles, iron and coal emerging in Belgium and the United States and later textiles in France.

The Industrial Revolution: A Very Short Introduction Robert C. Allen Very Short Introductions. Discusses the role of the Industrial Revololution, particularly in Britain, as a turning point in the creation of our own modern world

The Industrial Revolution. The planting of clover and turnips following the crops of wheat and barley helped replace nutrients in the soil, and therefore helped produce better crops the following year. The clover was used as a nutritious summer food for livestock, while turnips could be fed to animals in winter.

The Industrial Revolution (roughly 1760 to 1850) was a turning point in world history, for it inaugurated the era of sustained economic growth. The Revolution was not the abrupt discontinuity that its name suggests but was the result of the transformations of the early modern economy discussed in the last chapter.
