Special edition of the Federal Register, containing a codification of documents of general applicability and future effect ... with ancillaries.

We live in an age where our minds are rented and manipulated with bad news and trashy readings that affect our brains, our sensations, and moods. These virulent writings actively disrupt our decisions and program us to act out of fear. By limiting our ability to reason judiciously, we often issue opinions and make decisions on autopilot. Reading is the best food for the soul; it is very important to be selective with the type of information we feed our mind, because just as your physical health depends on the food you eat, your mental health is damaged if you subject it to toxic readings. Knowledge is vast, and this book brings you a diversity of topics which have been selected to nourish you correctly. Note:

I love rice and beans!

Drawing on literature reviews from ongoing unpublished research, research reports and symposia carried out on various aspects of the importance, ecology, biology and control of weedy rices, this publication also highlights global economic and environmental problems created by weedy rices, including red rice types.

The archaeology of war has revealed evidence of bravery, sacrifice, heroism, cowardice, and atrocities. Mostly absent from these narratives of victory and defeat, however, are the experiences of prisoners of war, despite what these can teach us about

cruelty, ingenuity, and human adaptability. The international array of case studies in Prisoners of War restores this hidden past through case studies of PoW camps of the Napoleonic era, the American Civil War, and both World Wars. These bring to light wide variations in historical and cultural details, excavation and investigative methods used, items found and their interpretation, and their contributions to archaeology, history and heritage. Illustrated with diagrams, period photographs, and historical quotations, these chapters vividly reveal challenges and opportunities for researchers and heritage managers, and revisit powerful ethical questions that persist to this day. Notorious and lesser-known aspects of PoW experiences that are addressed include: Designing and operating an 18th-century British PoW camp. Life and death at Confederate and Union American Civil War PoW camps. The role of possessions in coping strategies during World War I. The archaeology of the 'Great Escape' Experiencing and negotiating space at civilian internment camps in Germany and Allied PoW camps in Normandy in World War II. The role of archaeology in the memorial process, in America, Norway, Germany and France Graffiti, decorative ponds, illicit saké drinking, and family life at Japanese American camps As one of the first book-length examinations of this fascinating multidisciplinary topic, Prisoners of War merits serious attention from historians, social justice researchers and activists, archaeologists, and anthropologists.

"New media and development of gender roles: law, social, and economic perspective." This theme was raised as an effort to observe the development of new technology that has greatly affected people's lives. Formerly to seek information, people can get it

through conventional radio media, newspapers and television. But now only use the smartphone we can get very much information that can be obtained by accessing the online media portal or sharing and socializing through social media. For decades it has been stated that the media has the power to shape public opinion. Media not only can form a "worldview" of society, but also able to create awareness and individual belief in reality; a reality that has been defined by the media. Media has a powerful and direct effect to the audience (market). Including how then the media formed an opinion in the community about gender roles through the content provided by the new media. Of course it will be interesting to study media related to the law, social, and economic perspective.

The Handbook of East and Southeast Asian Archaeology focuses on the material culture and lifeways of the peoples of prehistoric and early historic East and Southeast Asia; their origins, behavior and identities as well as their biological, linguistic and cultural differences and commonalities. Emphasis is placed upon the interpretation of material culture to illuminate and explain social processes and relationships as well as behavior, technology, patterns and mechanisms of long-term change and chronology, in addition to the intellectual history of archaeology as a discipline in this diverse region. The Handbook augments archaeologically-focused chapters contributed by regional scholars by providing histories of research and intellectual traditions, and by maintaining a broadly comparative perspective. Archaeologically-derived data are emphasized with text-based documentary information, provided to complement interpretations of material culture. The Handbook is not restricted to art historical or purely descriptive per-

spectives; its geographical coverage includes the modern nation-states of China, Mongolia, Far Eastern Russia, North and South Korea, Japan, Taiwan, Vietnam, Cambodia, Laos, Thailand, Burma, Malaysia, Indonesia, the Philippines and East Timor.

These beautiful stories all have a sacred theme and speak to us in spiritual ways. How do we overcome greed? What is the meaning of real beauty, and how is it discovered?

In this engaging account of the crucial significance of rice for the Japanese, Emiko Ohnuki-Tierney examines how people use the metaphor of a principal food, such as rice, corn, or wheat, in conceptualizing themselves in relation to other peoples who eat other foods. *Rice as Self* shows how the Japanese identity was born through discourse with the Chinese, the first historical other. It shows how rice agriculture, in itself introduced from outside, was, ironically, appropriated as a dominant metaphor of the Japanese self. Since then rice and rice paddies have served as the vehicles for their deliberation of selves and others. Using for evidence such diverse sources as myth-histories of the eighth century, the imperial accession ritual, woodblock prints, novels, day-to-day discourse, and opinion polls, Ohnuki-Tierney shows that throughout Japan's history the cultural importance of rice has been deeply embedded in Japanese cosmology, both of the elite and common folk - rice as soul, rice as deity, and ultimately rice as self of the family, the community, and the nation at large. This, she emphasizes, has been so even though rice has not been the "staple food" of the Japanese, as is commonly held. Using Japan as an example, Ohnuki-Tierney proposes a new and complex cross-cultural model for the interpretation of selves and others.

The historical transformations of the Japanese identity have been intimately related not only to their encounter with foreigners - the external other - but also to the process of the marginalization of minorities within Japanese society - the internal other - and of external others who ceased to be the privileged other. The model takes into account the power inequities both within and outside a given society. It has broad applications, especially to people for whom foreign "cultural hegemony" is part and parcel of a complex, often ambivalent, process of self-identity.

The aim of this book is to provide the student of Japanese with a simple method for correlating the writing and the meaning of Japanese characters in such a way as to make them both easy to remember. It is intended not only for the beginner, but also for the more advanced student looking for some relief from the constant frustration of how to write the kanji and some way to systematize what he or she already knows. The author begins with writing because--contrary to first impressions--it is in fact the simpler of the two. He abandons the traditional method of ordering the kanji according to their frequency of use and organizes them according to their component parts or "primitive elements." Assigning each of these parts a distinct meaning with its own distinct image, the student is led to harness the powers of "imaginative memory" to learn the various combinations that result. In addition, each kanji is given its own key word to represent the meaning, or one of the principal meanings, of that character. These key words provide the setting for a particular kanji's "story," whose protagonists are the primitive elements. In this way, students are able to complete in a few short months a task that would otherwise take years. Armed with the same skills as Chinese or Korean students, who

know the meaning and writing of the kanji but not their pronunciation in Japanese, they are now in a much better position to learn to read (which is treated in a separate volume). From ampapagot (Cebuano for triggerfish) to ligaya (bread with red filling from Bicol) to ukuh ukuh (a Tausug dish resembling a sea urchin risotto), this dictionary gathers more than 8,000 terms relating to food ingredients, dishes, cooking styles, preparation techniques, and utensils, among others. For anyone who cooks or simply loves Filipino food, this book is a vital reference and an excellent cookbook supplement.

From the tiny shrew to the black bear, Pennsylvania's hills and valleys are teeming with sixty-three species of wild mammals. Many of these animals are rarely seen except when pursued by an interested biologist, mammologist, or nature photographer. Now, with the publication of this book, student, scholar, and nature lover alike will have a ready reference to distinguish between a deer mouse and a white-footed mouse, to identify raccoon tracks, and to learn about Pennsylvania's other inhabitants. An attractive backpack-size volume, written in lively prose, the *Guide to the Mammals of Pennsylvania* opens with a short introduction to Pennsylvania's environment and the characteristics defining a mammal. The bulk of the book consists of species accounts of the mammals grouped into families and orders. Each account includes a short list of data, a Pennsylvania range map, a North American range map, and a narrative of the physical, eco-

logical, and behavioral characteristics of the species. Exciting photographs of each of the species in its natural habitat, 17 in color, and drawings of animal tracks are especially useful for identification, and a glossary and a bibliography provide definitions and references for the serious reader. Naturalists, whether amateur or professional, will find the book useful in the field; it will be an indispensable tool in the classroom.

**Rice and Beans is a book about the paradox of local and global. On the one hand, this is a globe-spanning dish, a simple source of complete nutrition for billions of people in hundreds of countries. On the other hand, in every place people insist that rice and beans is a local invention, deeply rooted in a particular history and culture. How can something so universal also be so particular? The authors of this book explore the specific history of the versions of rice and beans beloved and indigenous in cultures from Brazil to West Africa. But they also plumb the shared African, Native American and European trans-Atlantic encounters and exchanges, and the contemporary forces of globalization and nation-building, which combine to make rice and beans a powerful substance and symbol of the relationship between food and culture.**

This alternate history from the award-winning author of 'The Wild Shore' takes us on a journey through seven hundred years of history as it never was, but might have been.

The ritual complexes of the Ehing, a farming people of southern Senegal, embody an elaborate set of prohibitions on social behavior and prescribe the general rules of Ehing social organization. Power is distributed and maintained in Ehing culture by the

concept of Odieng ("hatchet"), which as a spirit acts upon human beings much as an ax does upon a tree, falling from above to punish its victims for transgression. Marc Schloss's ethnography of the Ehing is a study of the meaning of Odieng's power, explaining why its rules are so essential to the Ehing way of life.
