John McWhorter's The Power of Babel fits precisely into this definition of a good book. McWhorter's main argument is that languages have been in a constant evolutionary flux since the first humans began speaking approximately 150,000 years ago.

There are approximately six thousand languages on Earth today, each a descendant of the tongue first spoken by Homo sapiens some 150,000 years ago. While laying out how languages mix and mutate over time, linguistics professor John McWhorter reminds us of the variety within the species that speaks them, and argues that, contrary to popular perception, language is not immutable and hidebound ...

#### **Tower of Babel - Wikipedia**

The tower of Babel story emphasizes the sharp contrast between man's opinion of his own achievements and God's point of view on man's accomplishments. The tower is a grandiose project -- the ultimate manmade achievement. It resembles the modern masterstrokes humans continue to build and boast about today, such as the International Space Station.
