NEG3VK - MAYA TREVON

Traces the remarkable life of a feminist poet through the items and images that have have defined her experiences My Life in 100 Objects is a personal reflection on the events and moments that shaped the life and work of one extraordinary woman. With a masterful, poetic voice, Margaret Randall uses talismanic objects and photographs as launching points for her nonlinear narrative. Through each “object,” Randall uncovers another part of herself, starting in a museum in Amman, Jordan, and ending in the Latin American Studies Association in Boston. Interwoven throughout are her most precious relationships, her growth as an artist, and her brave, revolutionary spirit. As Randall’s adventures often coincide with important moments in history, many of her objects provide a transcontinental glimpse into social upheavals and transitions. She shares memories from her years in Cuba (1969 to 1980) and Nicaragua (1980 to 1984), as well as briefer periods in North Vietnam (immediately preceding the end of the war in 1975), and Peru (during the government of Velasco Alvarado). In her introduction, Randall states, “objects and places have always been alive to me.” Her history too is alive, as much of a means to consider our own present as it is to glimpse her vibrant past.

Communication is essential to our lives, but how often do we stop to think about where the words we use have come from? Have you ever thought about which words in English have been borrowed from Arabic, French or Dutch? Try admiral, landscape and marmalade just for starters. The Secret Life of Words is a wide-ranging account not only of the history of English, but also of how words witness history, reflect social change and remind us of our turbulent past. Henry Hitchings delves into our promiscuous language and reveals how and why it has absorbed words from more than 350 other languages many originating from the most unlikely of places, such as shampoo from Hindi and kiosk from Turkish. From the Norman Conquest to the present day, Hitchings narrates the story of English as an archive of our human experience and uncovers the secrets behind everyday words. This is a celebration of our language; after reading it, you will never again take the words we use for granted.

This book looks at everyday, and not-so-everyday objects from a psychoanalytical perspective as well as the practice of art and design. It is an entertaining interpretation of the creation, consumption and culture of things we take for granted.

This collection enriches and complicates the history of prose fiction between Richardson and Fielding at mid-century and Austen at the turn of the century by focusing on it-narratives, a once popular form largely forgotten by readers and critics alike. The volume also advances important work on eighteenth-century consumer culture and the theory of things. The essays that comprise The Secret Life of Things thus bring new texts, and new ways of thinking about familiar ones, to our notice. Those essays range from the role of it-narratives in period debates about copyright to their complex relationship with object-riddled sentimental fictions, from anti-semitism in Chrysal to jingoistic imperialism in The Adventures of a Rupee, from the it-narrative as a variety of whore’s biography to a consideration of its contributions to an emergent middle-class ideology.

THE SUNDAY TIMES BESTSELLER 'A mind-expanding tour of the world without leaving your paintbox. Every colour has a story, and here are some of the most alluring, alarming, and thought-provoking. In this book Kassia St Clair has turned her lifelong obsession with colours and where they come from (whether Van Gogh's chrome yellow sunflowers or punk's fluorescent pink) into a unique study of human civilisation. Across fashion and politics, art and war, The Secret Lives of Colour tell the vivid story of our culture.

We love books. We take them to bed with us. They weigh down our suitcases on holiday. We display them on our bookshelves, give them as gifts, write our names in them. We take them for granted. And all the time, our books are leading a double life. The Secret Life of Books is about everything that isn't just the words. It's about how books transform us as individuals, the stories they tell us about ourselves. It's about how books - and readers - have evolved over time. And it's about why, even with the arrival of other media, books still have the power to change our lives. In this stylish and thought-provoking meditation, Tom Mole looks at everything from binding innovations to binding errors, to books defaced by lovers, to those imprisoning professors in their offices, to books in art, to burned books, to the books that create nations, to those we'll leave behind. A striking text in a stunning package, it will change how you think about books.

In the middle of New York City lies a neighborhood where all secrets are valuable, all assets are liquid, and all deals are sealed with a blessing rather than a contract. Welcome to the diamond district. Ninety percent of all diamonds that enter America pass through these few blocks, but the inner workings of this mysterious world are known only to the people who inhabit it. In Precious Objects, twenty-six-year-old journalist Alicia Oltuski, the daughter and granddaughter of diamond dealers, seamlessly blends family narrative with literary reportage to reveal the fascinating secrets of the diamond industry and its madcap characters: an Elvis-impersonating dealer, a duo of diamond-detective brothers, and her own eccentric father. With insight and drama, Oltuski limns her family’s diamond-paved move from communist Siberia to a displaced persons camp in post-World War II Germany to New York’s diamond district, exploring the connections among Jews and the industry, the gem and its lore, and the exotic citizens of this secluded world. Entertaining and illuminating, Precious Objects offers an insider’s look at the history, business, and society behind one of the world’s most coveted natural resources, providing an unforgettable backstage pass to an extraordinary and timeless show.

Becoming a Christian is the best and worst thing that has ever happened to Sarah Hollenbeck. Best because, well, that's obvious. Worst because, up to this point, she's made her very comfortable living as a well-known, bestselling author of steamy romance novels that would leave the members of her new church blushing. Now Sarah is trying to reconcile her past with the future she's chosen. She's still under contract with her publisher and on the hook with her enormous fan base for the kind of book she's not sure she can write anymore. She's beginning to think that the church might frown on her tithing on royalties from a "scandalous" book. And the fact that she's falling in love with her pastor doesn't make things any easier. With a powerful voice, penetrating insight, and plenty of wit, Bethany Turner explodes onto the scene with a debut that isn't afraid to deal with the thorny realities of living the Christian life.

Georgian landscape gardens are among the most visited and enjoyed of the UK's historical treasures. The Georgian garden has also been hailed as the greatest British contribution to European Art, seen as a beautiful composition created from grass, trees and water - a landscape for contemplation. But scratch below the surface and history reveals these gardens were a lot less serene and, in places, a great deal more scandalous.Beautifully illustrated in colour and black & white, this book is about the daily life of the Georgian garden. It reveals its previously untold secrets from early morning rides through to evening amorous liaisons. It explains how by the eighteenth century there was a desire to escape the busy country house where privacy was at a premium, and how these gardens evolved aesthetically, with modestly-sized, far-flung temples and other eye-catchers, to cater for escape and solitude as well as food, drink, music and fireworks. Its publication coincides with the 2016 tercentenary of the birth of Lancelot 'Capability' Brown, arguably Britain's greatest ever landscape gardener, and the book is uniquely positioned to put Brown's work into its social context.

Presents the found object artwork of Terry Border, who uses wires and everyday objects to depict amusing, quirky, and thoughtful works of art.

And yet hair finds its way into all manner of unexpected places, far from our heads, including cosmetics, clothes, ropes, personal and public collections, and even food. Whether treated as waste or as gift, relic, sacred offering or product in a billion-dollar industry for wigs and hair extensions, hair has many stories to tell. Collected from Hindu temples and Buddhist nunneries and salvaged by the strand from waste heaps and the combs of long-haired women, hair flows into the industry from many sources. Entering this strange world, Emma Tarlo tracks hair's movement across India, Myanmar, China, Africa, the United States, Britain and Europe, meeting people whose livelihoods depend on this singular commodity. Whether its journey ends in an Afro hair fair, a Jewish wig parlour, fashion salon or hair loss clinic, hair is oddly revealing of the lives it touches.

This is both a book of histories and a book about histories. It explores how lies become legends, trade routes spring up, and empires rise and fall—all from the perspective of your toothbrush or toilet.

The feature uniting these more than 450 varied objects is that each one bears a specific date, which marks a significant moment—for reasons personal or professional, religious or secular, private or public. From paintings to porringers, teapots to tape measures, the objects—and the stories they tell—offer a vivid sense of the lived experience of time, while providing a sweeping survey of the material world of early modern Britain.

Take a tour of the house where a microwave killed a gremlin, a typewriter made Jack a dull boy, a sewing machine fashioned Carrie's prom dress, and houseplants might kill you while you sleep. In Household Horror: Cinematic Fear and the Secret Life of Everyday Objects, Marc Olivier highlights the wonder, fear, and terrifying dimension of objects in horror cinema. Inspired by object-oriented ontology and the nonhuman turn in philosophy, Olivier places objects in film on par with humans, arguing, for example, that a sleeper sofa is as much the star of Sisters as Margot Kidder, that The Exorcist is about a possessed bed, and that Rosemary's Baby is a conflict between herbal shakes and prenatal vitamins. Household Horror reinvigorates horror film criticism by investigating the unfathomable being of objects as seemingly benign as remotes, radiators, refrigerators, and dining tables. Olivier questions what Hitchcock's Psycho tells us about shower curtains. What can we learn from Freddie Krueger's greatest accomplice, the mattress? Room by room, Olivier considers the dark side of fourteen household objects to demonstrate how the objects in these films manifest their own power and connect with specific cultural fears and concerns.

The author's memoir as called by objects from her life.

The System of Objects is a tour de force—a theoretical letter-in-a-bottle tossed into the ocean in 1968, which brilliantly communicates to us all the live ideas of the day. Pressing Freudian and Saussurean categories into the service of a basically Marxist perspective, The System of Objects offers a cultural critique of the commodity in consumer society. Baudrillard classifies the everyday objects of the “new technical order” as functional, nonfunctional and metafunctional. He contrasts “modern” and “traditional” functional objects, subjecting home furnishing and interior design to a celebrated semio-logical analysis. His treatment of nonfunctional or “marginal” objects focuses on antiques and the psychology of collecting, while the metafunctional category extends to the useless, the aberrant and even the “schizofunctional.” Finally, Baudrillard deals at length with the implications of credit and advertising for the commodification of everyday life. The System of Objects is a tour de force of the materialist semiotics of the early Baudrillard, who emerges in retrospect as something of a lightning rod for all the live ideas of the day: Bataille's political economy of “expenditure” and Mauss's theory of the gift; Reisman's lonely crowd and the “technological society” of Jacques Ellul; the structuralism of Roland Barthes in The System of Fashion; Henri Lefebvre's work on the social construction of space; and last, but not least, Guy Debord's situationist critique of the spectacle.

The tale begins over three-hundred years ago, when the Fair People—the goblins, fairies, dragons, and other fabled and fantastic creatures of a dozen lands—fled the Old World for the New, seeking haven from the ways of Man. With them came their precious jewels: diamonds, rubies, emeralds, pearls... But then the Fair People vanished, taking with them their twelve fabulous treasures. And they remained hidden until now... Across North America, these twelve treasures, over ten-thousand dollars in precious jewels in 1982 dollars, are buried. The key to finding each can be found within the twelve full-color paintings and verses of THE SECRET. Are you smart enough? THE SECRET: A TREASURE HUNT was published in 1982. The year before publication, the author and publisher Byron Preiss had traveled to 12 locations in the continental U.S. (and possibly Canada) to secretly bury a dozen ceramic casques. Each casque contained a small key that could be redeemed for one of 12 jewels Preiss kept in a safe deposit box in New York. The key to finding the casques was to match one of 12 paintings to one of 12 poetic verses, solve the resulting riddle, and start digging. Since 1982, only two of the 12 casques have been recovered. The first was located in Grant Park, Chicago, in 1984 by a group of students. The second was unearthed in 2004 in Cleveland by two members of the Quest4Treasure forum.
