The Social Licence To Operate is a fairly recent concept. It's derived from the wider "Corporate Social Responsibility" (CSR) concept through which companies have traditionally managed the ethical, legal, economic and philanthropic aspects of their operations. CSR has been around in various forms since the 1930's.

The Social Licence to Operate (SLO) is increasingly used in extractive industries both as a response to calls for greater community engagement and as a corporate sustainability strategy. Given its current popularity as a policy instrument, critiques on the SLO deserve attention.

The social licence to operate is a measure by which society participates in projects being carried out in their areas, requiring their consent before beginning. We explain you better in this article

[Modelling and Measuring the SLO 1 - License to Operate](#)

The Social License has been defined as existing when a project has the ongoing approval within the local community and other stakeholders, ongoing approval or broad social acceptance and, most frequently, as ongoing acceptance. At the level of an individual project the Social License is rooted in the beliefs, perceptions and opinions held by the local population and other stakeholders about the project.

According to Thomson and Boutilier (2011) a social licence to operate (SLO) is a com-

munity's perceptions of the acceptability of a company and its local operations.

There is little doubt that the primary burden of responsibility for obtaining and maintaining a social licence to operate rests with the corporations who want to develop projects that affect local communities. After all, it is the corporation who wants to dig up the ground or cut down trees (forestry), not the local community. A social licence to operate (SLO) refers to the level of acceptance or approval by local communities and stakeholders of organisations and their operations. The concept has evolved fairly recently from the broader and more established notions of "corporate social responsibility" and "social acceptability".
