### **The What on Earth? Wallbook Timeline of Nature by ...**

Earth formed around 4.54 billion years ago, approximately one-third the age of the universe, by accretion from the solar nebula. Volcanic outgassing probably created the primordial atmosphere and then the ocean, but the early atmosphere con-

tained almost no oxygen. Much of the Earth was molten because of frequent collisions with other bodies which led to extreme volcanism.

Meteorites bombarded Earth bringing along water and other elements. Earth's atmosphere became mostly carbon dioxide, water vapor, methane, and ammonia. 3.8 billion years:

### **Earth Day Timeline - HISTORY**

The Big History Timeline The Big History Timeline Wallbook. Where it all begins. Starting with the big bang and a "Space" line, the chart then adds an Earth timeline, then sky, sea, and land, before moving into the Stone Age. After that, the timelines are divided by continent and in some cases further divided by country.

### **The What on Earth? Wallbook Timeline of Big History What ...**

The Earth has been covered by giant assemblages of continents, called supercontinents, several times in its past. The best-known supercontinent, Pangaea, was the birthplace of the dinosaurs.

### **The What on Earth? Wallbook Timeline of Big History: The ...**

Start of Earth. After the Big Bang, floating space debris compacted in some areas to form asteroids, solar systems, stars, and even planets as awe-inspiring as our planet Earth. 4.6 billion years ago, when our timeline begins, the Earth looked nothing like it did in modern times. From its molten state, to the introduction of water and life,...
