The Theory of Social and Economic Organization by Max Weber

social organization. n. (Sociology) sociol the formation of a stable structure of relations inside a group, which provides a basis for order and patterns relationships for new members.

In sociology, the social disorganization theory is a theory developed by the Chicago School, related to ecological theories. The theory directly links crime rates to neighbourhood ecological characteristics; a core principle of social disorganization theory that states location matters. In other words, a person's residential location is a substantial factor shaping the likelihood that that person will become involved in illegal activities. The theory suggests that, among determinants of a person

Max Weber The Theory Of Social And Economic Organization ...

Organizational theory consists of many approaches to organizational analysis. "Organizations" are

defined as social units of people that are structured and managed to meet a need, or to pursue

collective goals. Theories of organizations include rational system perspective, division of labor,

bureaucratic theory, and contingency theory. In a rational organization system, there are two

significant parts: Specificity of Goals and Formalization. The division of labor is the specialization of
