The #1 New York Times bestselling memoir of U.S. Navy Seal Chris Kyle, and the source for Clint Eastwood's blockbuster, Academy-Award nominated movie. "An amazingly detailed account of fighting in Iraq--a humanizing, brave story that's extremely readable." — PATRICIA CORNWELL, New York Times Book Review "Jaw-dropping...Undeniably riveting." —RICHARD ROEPER, Chicago Sun-Times From 1999 to 2009, U.S. Navy SEAL Chris Kyle recorded the most career sniper kills in United States military history. His fellow American warriors, whom he protected with deadly precision from rooftops and stealth positions during the Iraq War, called him "The Legend"; meanwhile, the enemy feared him so much they named him al-Shaitan ("the devil") and placed a bounty on his head. Kyle, who was tragically killed in 2013, writes honestly about the pain of war—including the deaths of two close SEAL teammates—and in moving first-person passages throughout, his wife, Taya, speaks openly about the strains of war on their family, as well as on Chris. Gripping and unforgettable, Kyle's masterful account of his extraordinary battlefield experiences ranks as one of the great war memoirs of all time.

When the war ended on August 15, 1945, I was a naval engineering cadet at the Kure Navy Yard near Hiroshima, Japan. A week later, I was demobilized and returned to my home in Tokyo, fortunate not to find it ravaged by firebombing. At the beginning of September, a large contingent of the American occupation forces led by General Douglas MacArthur moved its base from Yokohama to Tokyo. Near my home I watched a procession of American military motor vehicles snaking along Highway 1. This truly awe-inspiring cavalcade included jeeps, two-and-a-half-ton trucks, and enormous trailers mounted with tanks and artillery. At the time, I was a 21-year-old student in the Machinery Section of Engineering at the Tokyo Imperial University. Watching that magnificent parade of military vehicles, I was more than impressed by the gap in industrial strength between Japan and the U. S. That realization led me to devote my whole life to the development of the Japanese auto industry. I wrote a small article concerning this incident in *Nikkei Sangyo Shimbun* (one of the leading business newspapers in Japan) on May 2, 1983. The English translation of this story was carried in the July 3, 1983 edition of the *Topeka Capital-Journal* and the September 13, 1983 issue of the *Asian Wall Street Journal*. The *Topeka Capital-Journal* headline read, "MacArthur's Jeeps Were the Toyota Catalyst."

I want theatre to be sweaty, exciting, unpredictable.... Mike Bradwell is on a mission to revolutionise British theatre. He's sick of fancy plays by dead blokes and wants to tell stories about real people, living real lives. And it doesn't get more real than *Hull*. In a freezing cold house on Coltman Street, a motley crew of unemployed actors gather to improvise a play with no name, no plot, no budget and no bookings. Richard Bean's (*The Hypocrite*, *One Man, Two Guvnors*) hilarious and irreverent comedy takes us back to the 70s and *Hull Truck Theatre's* origin story. It is a roaring combination of comedy, cabaret, farce and drama. Join us for a celebration of where it all began... This edition was published to coincide with the world premiere at *Hull Truck Theatre* in February 2022.

This book revisits the early systemic formation of meditation practices called 'yoga' in South Asia by employing metaphor theory. Karen O'Brien-Kop also develops an alternative way of analysing the reception history of yoga that aims to decentre the Eurocentric and imperialist enterprises of the nineteenth-century to reframe the cultural period of the 1st - 5th centuries CE using categorical markers from South Asian intellectual history. Buddhist traditions were just as concerned as Hindu traditions with meditative disciplines of yoga. By exploring the intertextuality of the *Patanjalayogasastra* with texts such as Vasubandhu's *Abhidharmakosabhasya* and Asanga's *Yogacarabhumisastra*, this book highlights and clarifies many ideologically Buddhist concepts and practices in *Patanjala yoga*. Karen O'Brien-Kop demonstrates that 'classical yoga' was co-constructed systemically by both Hindu and Buddhist thinkers who were drawing on the same conceptual metaphors of the period. This analysis demystifies early yoga-meditation as a timeless 'classical' practice and locates it in a specific material context of agrarian and urban economies.

The idea to deny sanctuary to terrorist groups lies at the heart of contemporary U.S. counterterrorism strategy. Violent extremist organizations in North Africa, most notably the group al-Qaeda in the Islamic Maghreb (AQIM), have used remote and sparsely populated areas in the Sahara for protection from security forces to perform a range of activities such as training, planning, and logistics in order to conduct terrorist operations like kidnapping, murder, and bombing. Even after 16 years since the September 11 attacks and the resources dedicated to efforts to deny sanctuary, the concept of sanctuary remains largely unexplored. To deny sanctuary requires an understanding of what sanctuary is as an object and how sanctuary is used by terrorist organizations. This monograph proposes a functional understanding of sanctuary and offers fresh ideas to control sanctuary using a detailed case study of the most notorious of the North African terrorists, Mokhtar Belmokhtar, from his arrival to Mali in the late 1990s until the French intervention in early 2012. This multi-disciplinary inquiry utilizes a wide range of open-source documents as well as anthropological, sociological, and political science research, including interviews with one-time Belmokhtar hostage, Ambassador Robert Fowler, in order to construct a picture of what a day in the life of sanctuary-seeking terrorists is like. Belmokhtar and other violent groups remain active and at large in the Sahara in spite of a large French military presence, a small U.S. military presence, and local security forces conducting counterterrorism and counterinsurgency operations. Additionally, the Islamic State movement could be viewed as the emergence of mega sanctuaries for terrorists and other violent extremist organizations. These threats require a new strategy to isolate, contain, or defeat terrorists and violent extremists in their sanctuary areas.
