Ultrasound pudendal injection. (Reproduced with permission from Rofaeel A, Peng P, Louis I, Chan V. Feasibility of real-time ultrasound for pudendal nerve block in patients with chronic perineal pain. *Reg Anesth Pain Med* 2008;33:139-45.) • After verifying the location of the needle, local anesthetic and deposteroid are then injected.

**Fluoroscopy-guided pudendal nerve block and pulsed ...**

The block was effective in

88% of cases. Conclusion. The new technique of ultrasound-guided pudendal nerve block, described in this study, seems to be easy to perform with a good success rate, and probably improves safety of the puncture and of the injection by real-time visualization of anatomical structures and local anesthetic spread.

The investigators have implemented application of ultrasound guided dorsal penile nerve block into practice for these type of surgeries. Main purpose of this study is to compare the efficacy of nerve stimulator guided pudendal nerve block with ultrasound guided dorsal penile nerve block for post-operative analgesia after hypospadias surgery.

Ultrasound-guided Pudendal Block Is a Viable Alternative to Caudal Block for Hypospadias Surgery: A Single-Surgeon Pilot

Study. Hecht S(1), Piñeda J(2), Bayne A(3). Author information: (1)Division of Pediatric Urology, Doernbecher Children's Hospital, Portland, OR.

Background and Objectives Ultrasound-guided techniques for pudendal nerve block have been described at the level of the ischial spine and transperineally. Theoretically, however, blockade of the pudendal nerve inside Alcock canal with a small local anesthetic volume would minimize the risk of sacral plexus blockade and would anesthetize all 3 branches of the pudendal nerve before they ramify ...

Pudendal nerve block (PNB) is performed for differential diagnosis and treatment of chronic pelvic and perineal pain. Several block methods, such as transvaginal, transperineal, computerized tomography-, ultrasound- and fluoroscopy-

-guided approach are currently under practice. Compared to others, a fluoroscopy-guided approach has several advantages, such as its relatively low cost, facility ...

### **Fluoroscopy-guided pudendal nerve block and pulsed ...**

The pudendal nerve provides the majority sensations and functions of the external genitals, the urethra, the anus, and perineum. It also controls the external anal sphincter and the sphincter muscles of the bladder. Image-guided pudendal nerve block is the most important diagnostic test following history and physical examination for patients with suspected pudendal neuralgia.
