No one can Copy Your Personal Data. No one Can Delete Your Files. No one Can Rename Your Files.

#### **How to make Your files- "UnCopyable"**

The primary problem is that if a file can be read into memory, that file can be copied from memory and stored again in a different location. If the file cannot be read into memory, then the file is useless. This says nothing about the encryption, and the data in the copy may be useless without decryption keys.
