## YFJ03Q - TIANA YOSELIN

Guide to Financial Statement Analysis. The main task of an analyst is to perform an extensive analysis of financial statements. Three Financial Statements The three financial statements are the income statement, the balance sheet, and the statement of cash flows. These three core statements are intricately.

The 4 basic types of financial statements are income statement, balance sheet, cash flow statement, and the statement of retained earnings. The analysis of these statements helps in understanding the current financial condition of an organization. Statements prepared for dummies are simple in their format.

Financial statements are the main way to report financial information to people within your organization, such as management and employees and to people outside your organizations such as banks, investors, suppliers and others. For example, a small excavating company significantly increased sales for three straight years then failed.

To summarize, financial statement analysis is concerned with analyzing the balance sheet and the income statement of a business to interpret the business and financial ratios of a business for financial representations, business evaluation, in addition to financial forecasting.

### Financial statement analysis – AccountingTools

Overview of Financial Statement Analysis. Financial statement analysis involves gaining an understanding of an organization's financial situation by reviewing its financial reports. The results can be used to make investment and lending decisions. This review involves identifying the following items for a company's financial statements over a series of reporting periods:  
**Ten Ratios for Financial Statement**

### Analysis - dummies

Financial statements are the report card of a business. Whether you are a new investor, a small business owner, an executive, or just trying to keep track of your personal finances, you need to understand how to read, analyze, and create financial statements so you can get a full and accurate understanding of your finances. Financial statements will tell you how much money the operation has stashed away, how much debt is owed, the income coming in each month, and the expenses going out the door.

A financial analysis of a company's financial statements—along with the footnotes in the annual report—is essential for any serious investor seeking to understand and value a company properly.
