 Still ' {UnicodeDecodeError}'utf-8' codec can't decode byte 0xfc in position 9230: invalid start byte' AgentChris commented on Apr 7, 2018 yeah the workaround didn't work for me too wgordon17 commented on Apr 26, 2018  
 While I importing the file it shows. UnicodeDecodeError: "utf-8" codec can't decode byte 0xa0 in position 10: invalid start byte.  
 Code: import pandas as pd a = pd.read\_csv("filename.csv")  
 UnicodeDecodeError: "utf-8" codec can't decode byte in ...  
 Fix Python Pandas Read CSV File: UnicodeDecodeError: 'utf ...  
 UnicodeDecodeError: 'utf-8' codec can't decode byte 0xbe ...  
 Best answer You have to use the encoding as latin1 to read this file as there are some special character in this file, use the below code snippet to read the file.

The error is because there is some non-ascii character in the dictionary and it can't be encoded/decoded. One simple way to avoid this error is to encode such strings with encode () function as follows (if a is the string with non-ascii character): a.encode ('utf-8').strip () share.
