Indexes the Times, Sunday times and magazine, Times literary supplement, Times educational supplement, Times educational supplement Scotland, and the Times higher education supplement. Destination marketing relies on planning, organisation, and successful strategies and tactics. Tourism Planning and Destination Marketing provides an in-depth understanding of the tourism marketing environment, including destination branding, distribution channels, etourism, digital media, and sustainable and responsible tourism practices.

This new edition incorpo-

rates revised guidance from H.M Treasury which is designed to promote efficient policy development and resource allocation across government through the use of a thorough, long-term and analytically robust approach to the appraisal and evaluation of public service projects before significant funds are committed. It is the first edition to have been aided by a consultation process in order to ensure the guidance is clearer and more closely tailored to suit the needs of users.

This full colour student book gives candidates a further five units to complete the Double Award. It is exactly matched to the specifications of OCR.

The Mental capacity Act 2005 provides a statutory framework for people who lack the capacity to make decisions for themselves, or for people who want to make provision for a time when they will be unable to make their own decisions. This code of practice, which has statutory force, provides information and guidance about how the Act should work in practice. It explains the principles behind the Act, defines when someone is incapable of making their own decisions and explains what is meant by acting in someone's best interests. It describes the role of the new Court of Protection and the role of Independent Mental Capacity Advocates and sets

out the role of the Public Guardian. It also covers medical treatment and the way disputes can be resolved.

The future of disability in America will depend on how well the U.S. prepares for and manages the demographic, fiscal, and technological developments that will unfold during the next two to three decades. Building upon two prior studies from the Institute of Medicine (the 1991 Institute of Medicine's report *Disability in America* and the 1997 report *Enabling America*), *The Future of Disability in America* examines both progress and concerns about continuing barriers that limit the independence, productivity, and participation in community life of people with disabilities. This book offers a comprehensive look at a wide range of issues, including the prevalence of disability across the lifespan; disability trends the role of assistive technology; barriers posed by health care and other facilities with inaccessible buildings, equipment, and information formats; the needs of young people moving from pediatric to adult health care and of adults experiencing premature aging and secondary health problems;

selected issues in health care financing (e.g., risk adjusting payments to health plans, coverage of assistive technology); and the organizing and financing of disability-related research. *The Future of Disability in America* is an assessment of both principles and scientific evidence for disability policies and services. This book's recommendations propose steps to eliminate barriers and strengthen the evidence base for future public and private actions to reduce the impact of disability on individuals, families, and society.

Energy for Rural and Island Communities III contains the proceedings of the Third International Conference held at Inverness, Scotland, in September 1983. The book is organized into 10 parts, separating the same number of topics in the field of energy for rural and island communities, particularly, energy and development; wind energy; photovoltaic systems; and solar energy. The text also covers wave energy, hydro power, biofuels, and geothermal energy. Energy in transport sector and the Energy Act Workshop are also described.

Developed from celebrated Harvard statistics lec-

tures, *Introduction to Probability* provides essential language and tools for understanding statistics, randomness, and uncertainty. The book explores a wide variety of applications and examples, ranging from coincidences and paradoxes to Google PageRank and Markov chain Monte Carlo (MCMC). Additional application areas explored include genetics, medicine, computer science, and information theory. The print book version includes a code that provides free access to an eBook version. The authors present the material in an accessible style and motivate concepts using real-world examples. Throughout, they use stories to uncover connections between the fundamental distributions in statistics and conditioning to reduce complicated problems to manageable pieces. The book includes many intuitive explanations, diagrams, and practice problems. Each chapter ends with a section showing how to perform relevant simulations and calculations in R, a free statistical software environment.

Tourism Impacts, Planning and Management is a unique text, which links these three key areas of tourism: impacts, plann-

ing and management. Tourism impacts are multi-faceted and therefore are difficult to plan for and manage. This book looks at all the key players involved - be they tourists, host communities or industry members - and considers a number of approaches and techniques for managing tourism successfully. Divided into four parts, this text discusses: * The growth, development and impacts of tourism * Tourism planning and management: concepts, issues and key players * Tools and techniques in tourism planning and management: education, regulation and information technology * The future of tourism planning and management: issues of sustainability and the future

Up-to-date, international case studies are used, for example the impacts of 9/11 and terrorism in Bali, to illustrate and provide a real-life context for the theories discussed. Exercises are also included to consolidate learning.

Written specifically for the Cambridge syllabus, this updated series provides clear and practical support for students and teachers. Cambridge IGCSE First Language English, Third edition has been written specifically

for the University of Cambridge International Examinations syllabus. Written by a highly experienced and well-known author, this new and updated coursebook includes clear, practical support for students, a diverse range of topical stimulus material to enliven the subject, imaginative activities and exam tips that build confidence and develop the skills needed to succeed in the examination.

This report reviews engineering's importance to human, economic, social and cultural development and in addressing the UN Millennium Development Goals. Engineering tends to be viewed as a national issue, but engineering knowledge, companies, conferences and journals, all demonstrate that it is as international as science. The report reviews the role of engineering in development, and covers issues including poverty reduction, sustainable development, climate change mitigation and adaptation. It presents the various fields of engineering around the world and is intended to identify issues and challenges facing engineering, promote better understanding of engineering and its role, and highlight ways of making engineering more at-

tractive to young people, especially women.--Publisher's description.

The CEFR Companion volume broadens the scope of language education. It reflects academic and societal developments since the publication of the Common European Framework of Reference for Languages (CEFR) and updates the 2001 version. It owes much to the contributions of members of the language teaching profession across Europe and beyond. This volume contains: ► an explanation of the key aspects of the CEFR for teaching and learning; ► a complete set of updated CEFR descriptors that replaces the 2001 set with: - modality-inclusive and gender-neutral descriptors; - added detail on listening and reading; - a new Pre-A1 level, plus enriched description at A1 and C levels; - a replacement scale for phonological competence; - new scales for mediation, online interaction and plurilingual/pluricultural competence; - new scales for sign language competence; ► a short report on the four-year development, validation and consultation processes. The CEFR Companion volume represents another step in a process of engagement with language education

that has been pursued by the Council of Europe since 1971 and which seeks to: ► promote and support the learning and teaching of modern languages; ► enhance intercultural dialogue, and thus mutual understanding, social cohesion and democracy; ► protect linguistic and cultural diversity in Europe; and ► promote the right to quality education for all.

Self-Organising Maps: Applications in GI Science brings together the latest geographical research where extensive use has been made of the SOM algorithm, and provides readers with a snapshot of these tools that can then be adapted and used in new research projects. The book begins with an overview of the SOM technique and the most commonly used (and freely available) software; it is then sectioned to look at the different uses of the technique, namely clustering, data mining and cartography, from a range of application-areas in the biophysical and socio-economic environments. Only book that takes SOM algorithm to the GIS and Geography research communities The Editors draw together expert contributors from the UK, Europe, USA,

New Zealand, and South Africa Covers a range of techniques in clustering, data mining cartography, all featuring an appropriate case study

Part of a series of six student books which are matched to every type of AS level GCE course students can take - whether it is a single award or double award with Edexcel, OCR or AQA.

This antiquarian volume contains a comprehensive treatise on democracy and education, being an introduction to the 'philosophy of education'. Written in clear, concise language and full of interesting expositions and thought-provoking assertions, this volume will appeal to those with an interest in the role of education in society, and it would make for a great addition to collections of allied literature. The chapters of this book include: 'Education as a Necessity of Life'; 'Education as a Social Function'; 'Education as Direction'; 'Education as Growth'; 'Preparation, Unfolding, and Formal Discipline'; 'Education as Conservative and Progressive'; 'The Democratic Conception in Education'; 'Aims in Education', etcetera. We are republishing this vintage book now complete with a new

prefatory biography of the author.

Covering both core and option units, with an accompanying CD-ROM containing further IT units, this full-colour candidate handbook matches the NVQ Business and Administration standards.

This book gives an overview of the different courses and qualifications available to young people post-GCSE. It profiles over 40 of the most popular A-level, AS-level and new diploma subject areas, listing everything students need to know to make an informed choice. The only book on the market to link post-16 options to future career aspirations, it contains independent advice providing all the options so that students can choose which route is best for them without outside influence/pressure. Easily navigable it is divided into sections by subject area and listed alphabetically making it easy for students to browse. Author Gary Woodward is a qualified careers consultant and has significant experience of advising young people about education and career options as well as job hunting.

Collocations are combinations of words which frequently appear together.

Using them makes your English sound more natural. Presents and explains approximately 1,500 word combinations in typical contexts using tables, charts, short texts and dialogues.

In this ambitious study of the intense and often adversarial relationship between English and American literature in the nineteenth century, Robert Weisbuch portrays the rise of American literary nationalism as a self-conscious effort to resist and, finally, to transcend the contemporary British influence. Describing the transatlantic "double-cross" of literary influence, Weisbuch documents both the American desire to create a literature distinctly different from English models and the English insistence that any such attempt could only fail. The American response, as he demonstrates, was to make strengths out of national disadvantages by rethinking history, time, and traditional concepts of the self, and by reinterpreting and ridiculing major British texts in mocking allusions and scornful parodies. Weisbuch approaches a precise characterization of this "double-cross" by focusing on paired sets of

English and American texts. Investigations of the causes, motives, and literary results of the struggle alternate with detailed analyses of several test cases. Weisbuch considers Melville's challenge to Dickens, Thoreau's response to Coleridge and Wordsworth, Hawthorne's adaptation of Keats and influence on Eliot, Whitman's competition with Arnold, and Poe's reshaping of Shelley. Adding a new dimension to the exploration of an emerging aesthetic consciousness, *Atlantic Double-Cross* provides important insights into the creation of the American literary canon.

A new approach to English language teaching which will be beneficial to students at the college level. The reading material is well-chosen from a variety of sources, and exercises on vocabulary, comprehension, note-taking, note-making, conducting an interview, collecting information and writing reports give the student a practical knowledge of the English language.

In order to develop student competencies in K-12 and Higher Education environments, evidence-based tools and concepts are essential in ensuring the development of student skills and profi-

ciencies. Evidence-based pedagogical practices leading to student learning preferences culturally and internationally are essential to educational success. *Challenges and Opportunities in Global Approaches to Education* is an essential research publication that provides evidence-based tools and concepts to develop student competencies in the K-20 environment. Chapters in the monograph cover topics in a theoretical context such as how technology, online learning, and culture inform evidence-based development of student competencies. This book is essential for curriculum teachers, designers, instructional designers, administrators, professionals, researchers, academicians, and students concerned with the management of expertise, knowledge, information, and organizational development in different types of educational communities and environments.

Exactly what you need for the new GCEs in Travel and Tourism These four student books are matched to every type of AS Level GCE course students can take - whether it is a single award or double award with Edexcel or

OCR. Pitched at just the right level for GCE candidates, with accessible style and content. Written by an experienced author team to give tutors absolute confidence in the quality of the content. Fully covers all the units students need for either a single or a double award. In full colour.
