Both Probability and Statistics and Statistical Reasoning include four units, with different Probability units (Unit 3), as outlined below. Unit 1. Exploratory Data Analysis. This is organized into two modules - Examining Distributions and Examining Relationships. The general approach is to provide students with a framework that will help ...

Probability is the branch of mathematics concerning numerical descriptions of how likely an event is to occur, or how likely it is that a proposition is true. The probability of an event is a number between 0 and 1, where, roughly speaking, 0 indicates impossibility of the event and 1 indicates certainty.

When we used two-way tables in the Exploratory Data Analysis (EDA) section, it was to record values of two categorical variables for a concrete sample of individuals. In contrast, the information in a probability two-way table is for an entire population, and the values are rather abstract.
