This book is open access under a CC BY 4.0 license "Francesca Billiani and Laura Pennacchietti draw brilliantly and with precision the evolution of the new architecture and of the national novel (with insights on translations of international novels), whose profiles had been shaped from different angles, especially in the 1930s. These two fields, apparently so distant one from the other, had never been analysed in parallel. This book does this and uncovers several points of contact between the two, spanning propaganda and theoretical turning points." —Chiara Costa and Cornelia Mattiacci, Fondazione Prada, Italy "This book shows convincingly how the arte di Stato during Fascism was created with the morality of a new novel as well as architecture. It is surprising to read how one of the representatives of State art, Giuseppe Bottai, is also one of the finest critics of realist novels and rationalist architecture. More than parallel endeavours, the system of the arts during the Fascist regime should be viewed as a series of intersections of cultural, political and aesthetic discourses." —Monica Jansen, Utrecht University, The Netherlands Architecture and the Novel under the Italian Fascist Regime discusses the relationship between the novel and architecture during the Fascist period in Italy (1922-1943). By looking at two profoundly diverse aesthetic phenomena within the context of the creation of a Fascist State art, Billiani and Pennacchietti argue that an effort of construction, or reconstruction, was the main driving force behind both projects: the advocated "revolution" of the novel form (realism) and that of architecture (rationalism). The book is divided into seven chapters, which in turn analyze the interconnections between the novel and architecture in theory and in practice. The first six chapters cover debates on State art, on the novel and on architecture, as well as their histori-

cal development and their unfolding in key journals of the period. The last chapter offers a detailed analysis of some important novels and buildings, which have in practice realized some of the key principles articulated in the theoretical disputes. Francesca Billiani is Senior Lecturer in Italian Studies and Director of the Centre for Interdisciplinary Research in the Arts and Languages at the University of Manchester, UK. Laura Pennacchietti is Research Associate in Italian Studies at the University of Manchester, UK.

A humorous story about the absurd excuses for not doing homework.

The Years of Alienation in Italy offers an interdisciplinary overview of the socio-political, psychological, philosophical, and cultural meanings that the notion of alienation took on in Italy between the 1960s and the 1970s. It addresses alienation as a social

condition of estrangement caused by the capitalist system, a pathological state of the mind and an ontological condition of subjectivity. Contributors to the edited volume explore the pervasive influence this multifarious concept had on literature, cinema, architecture, and photography in Italy. The collection also theoretically reassesses the notion of alienation from a novel perspective, employing Italy as a paradigmatic case study in its pioneering role in the revolution of mental health care and factory work during these two decades.

Ethics, Politics and Justice in Dante presents new research by international scholars on the themes of ethics, politics and justice in the works of Dante Alighieri, including chapters on Dante's modern 'after-life'. Together the chapters explore how Dante's writings engage with the contemporary culture of medieval Florence and Italy, and how and why his political and moral thought still speaks compellingly to modern readers. The collection's contributors range across different disciplines and scholarly traditions – history, philology, classical reception, philosophy, theology – to scrutinise Dante's *Divine Comedy* and his other works in Italian and Latin, offering a multi-faceted approach to the evolution of Dante's political, ethical and legal thought throughout his writing career. Certain chapters focus on his early philosophical *Convivio* and on the accomplished Latin *Eclogues* of his final years, while others tackle knotty themes relating to judgement, justice, rhetoric and literary ethics in his *Divine Comedy*, from hell to paradise. The closing chapters discuss different modalities of the public reception and use of Dante's work in both Italy and Britain, bringing the volume's emphasis on morality, political philosophy, and social justice into the modern age of the nineteenth, twentieth, and twenty-first centuries.

Mit "Fundamental Questions" legt die Max-Planck-Gesellschaft zum ersten Mal einen Sammelband zur Geschlechterforschung vor. Dank des breiten Spektrums der in der Forschungsgesellschaft vertretenen Fachrichtungen und Fachkulturen präsentieren die aus verschiedenen Instituten stammenden AutorInnen Erkenntnisse aus zahlreichen Forschungsfeldern: Recht, Kunstgeschichte, Wissenschaftsgeschichte, Neurowissenschaften und Informatik. Ebenso vielgestaltig sind die Ansätze, Themen, Fragestellungen und Methodik der versammelten Beiträge. Diese Vielfalt zeigt in bester Art und Weise, dass die Integration der Geschlechterperspektive nicht nur für angewandte Wissenschaft und Entwick-

lung, sondern ebenso für die Grundlagenforschung gewinnbringend ist. Mit Beiträgen von Dr. Laura A. Bechthold, Elifcan Celebi, Dr. Marina Chugunova, Dr. Luisa Stella de Oliveira Coutinho Silva, Svenja Friess, Ph.D. Giorgia Gastaldon, Dr. Lisa Hanstein, Dr. Philine Helas, Prof. Karin Hoisl, Ph.D. Michael E. Rose, Esra Sarioglu, Isabel Valera und Dr. Ulla Weber.

The twentieth century saw a proliferation of media discourses on colonialism and, later, decolonisation. Newspapers, periodicals, films, radio and TV broadcasts contributed to the construction of the image of the African "Other" across the colonial world. In recent years, a growing body of literature has explored the role of these media in many colonial societies. As regards the Italian context, however, although several works have been published about the links between colonial culture and national identity, none have addressed the specific role of the media and their impact on collective memory (or lack thereof). This book fills that gap, providing a review of images and themes that have surfaced and resurfaced over time. The volume is divided into two sections, each organised around an underlying theme: while the first deals with visual memory and images from the cinema, radio, television and new media, the second addresses the role of the printed press, graphic novels and comics, photography and trading cards.

John of Garland's *Parisiana poetria*, first published about 1220, expounds medieval poetic theory and summarizes contemporary thought about writing. The long account of rhymed poetry included here is the most complete that has survived. This volume presents the most authoritative edition of the Latin text alongside a fresh English translation.

The second edition of this hugely successful textbook provides comprehensive coverage of a wide range of topics in theoretical and applied linguistics. Written by leading academics in the field, this text offers a firm grounding in linguistics and includes engaging insights into current research. It covers all the key areas of linguistic analysis, including phonetics, morphology, semantics and pragmatics, and core domains of study, comprising the history of the English language, regional and social variation, style and communication and interaction. Fresh material on research methods outlines key areas for consideration when carrying out a research project, and provides students with the framework they need to investigate linguistic phenomena for themselves. This is an invaluable resource for both undergraduate and post-

graduate students on English language and linguistics degree programmes. New to this Edition: - Seven new chapters covering topics such as second language acquisition, corpus linguistics and research methods - A number of chapters have been substantially revised, including those on World Englishes, Literacies in Cyberspace and TEFL, TESOL and Linguistics - Fully updated throughout to reflect the latest advances in the field

The anatomy theater is where students of the human body learn to isolate structures in decaying remains, scrutinize their parts, and assess their importance. Taking a new look at the history of anatomy, the author places public dissections alongside private ones to show how the anatomical theater was both a space of philosophical learning and a place where students learned to behave in a civil manner towards their teachers, their peers, and the corpse.

The Paralympic Games is the second largest multi-sport festival on earth and an event which poses profound and challenging questions about the nature of sport, disability and society. The *Paralympic Games Explained* is the first complete introduction to the Paralympic phenomenon, exploring every key aspect and issue, from the history and development of the Paralympic movement to the economic and social impact of the contemporary Games. The book introduces the three most important theoretical models of disability (medical, social and bio-social), to enable the reader to fully understand the Paralympics in the context of wider discussions of disability in society. It also offers a straightforward explanation of the importance of language and terminology in shaping our understanding of disability and disability sport. Including international examples and comparative material throughout, the book offers detailed and broad-ranging discussion of key issues such as: how societal attitudes influence disability sport the governance of Paralympic and elite disability sport the relationship between the Paralympics and the Olympics drugs and technology in disability sport classification in disability sport. Containing useful features throughout, such as review questions, study activities, web links and guides to further reading, *The Paralympic Games Explained* is the most accessible, comprehensive and thoughtful guide to the Paralympics currently available. It is essential reading for all students with an interest in disability sport, sporting mega-events, the politics of sport, or disability in society.

Leo is an Italian writer in his thirties. Thomas, his German lover, is dead. On a plane to Munich, Thomas's home town, Leo slips

into a reverie of their meeting and life in Paris, nights in Thomas's flat in Montmartre and a desperate, drug-induced flight through the forests of northern France that spells the end for Leo and Thomas' languid, erotic life together. Leo travels to find anonymity. Structured in three musical movements, *Separate Rooms* is a story of ideal love, broken by absence and separation. When Thomas was alive, he and Leo had separate rooms in order to preserve the urgency of their passion. Now, Leo faces solitude, the impossible striving of memory to recreate life and the hostility of a prejudiced world. *Separate Rooms*, Tondelli's last book, is a powerful novel of the strength of love and the trauma of death.

This book examines the creative exchanges between architects, artists and intellectuals, from the Early Renaissance to the beginning of the Enlightenment, in the forging of relationships between architecture and emerging concepts of language in early modern Italy. The study extends across the spectrum of linguistic disputes during this time - among members of the clergy, humanists, philosophers and polymaths - on issues of grammar, rhetoric, philology, etymology and epigraphy, and how these disputes paralleled and informed important developments in architectural thinking and practice. Drawing upon a wealth of primary source material, such as humanist tracts, philosophical works, architectural/antiquarian treatises, epigraphic/philological studies, religious sermons and grammaticae, the book traces key periods when the emerging field of linguistics in early modern Italy impacted on the theory, design and symbolism of buildings.

Benjamin G. Kohl (1938-2010) taught at Vassar College from 1966 till his retirement as Andrew W. Mellon Professor of the Humanities in 2001. His doctoral research at The Johns Hopkins University was directed by Frederic C. Lane, and his principal historical interests focused on northern Italy during the Renaissance, especially on Padua and Venice. His scholarly production includes the volumes *Padua under the Carrara, 1318-1405* (1998), and *Culture and Politics in Early Renaissance Padua* (2001), and the online database *The Rulers of Venice, 1332-1524* (2009). The database is eloquent testimony of his priority attention to historical sources and to their accessibility, and also of his enthusiasm for collaboration and sharing among scholars.

This is the first comprehensive International Handbook on the History of Mathematics Education, covering a wide spectrum of

epochs and civilizations, countries and cultures. Until now, much of the research into the rich and varied history of mathematics education has remained inaccessible to the vast majority of scholars, not least because it has been written in the language, and for readers, of an individual country. And yet a historical overview, however brief, has become an indispensable element of nearly every dissertation and scholarly article. This handbook provides, for the first time, a comprehensive and systematic aid for researchers around the world in finding the information they need about historical developments in mathematics education, not only in their own countries, but globally as well. Although written primarily for mathematics educators, this handbook will also be of interest to researchers of the history of education in general, as well as specialists in cultural and even social history.

La fisica spiega il funzionamento della Natura a ogni livello, dall'immensità dell'Universo alle particelle subatomiche, e le sue leggi si possono tradurre anche in formule di comportamento nelle relazioni interpersonali. L'autore conduce in un viaggio dell'intelletto fra concetti che raramente sono stati accostati: la metrica dei comportamenti umani, il principio di azione e reazione nelle relazioni interpersonali, la termodinamica degli esseri umani, le leggi della dinamica e le interazioni tra le persone. Il libro si rivolge a chiunque gestisca rapporti umani, ovvero tutti, negli ambiti familiari, lavorativi e sociali; e racconta come, a fronte del nostro sforzo di coltivare una dimensione "tecnica" e psicologica nei rapporti umani, la nostra natura - o meglio la Natura, di cui facciamo parte - ci mostra qualche scorciatoia per capire meglio noi stessi e gli altri.
