Expert practical advice from an experienced race engine builder on how to build a high-performance version of Ford's naturally aspirated 4-cylinder 1600, 1800 & 2000cc Pinto engine which has been used in Ford's most popular cars (Escort, Capri, Cortina & Sierra - Ford/Mercury Capri, Pinto, Bobcat in USA) over many years. Whether the reader wants a fast road car or to go racing, Des explains, without using technical jargon, just how to build a reliable high-power engine using as many stock parts as possible and without wasting money on parts and modifications that don't work. Also covers Cosworth versions of Pinto engines and fitting Cosworth heads to Pinto blocks. Does not cover 1300, E-Max 1600 or American-built 2300.

Runways and Racers concentrates on the short transitional period, 1952-1954, for sports car racing in America following the ban on public road racing in many of the States. The ban left the rapidly expanding Sports Car Club of America with a problem: where to hold races. At precisely the same time, Curtis LeMay, head of Strategic Air Command, was having problems obtaining funds from Congress to improve conditions on the many air bases located around the country. The solution was a marriage of convenience, whereby the SCCA was allowed access to active SAC air bases to hold its race programmes. In return, the SAC base would receive the net profits from the event, which would be put into the Airmen's Living Improvement Fund. As a result of some initial financial success for the SAC bases, the scheme was also adopted by non-SAC bases together with regional clubs, with the same agreement in place. Complaints from airmen alerted Congressman Errett Scrivner to potential irregularities, and he ordered an audit to be conducted to ascertain precisely what it was costing the air bases to host the races. His findings led to the cessation of the races, ordered by Congress. The product of a long period of extensive research by the author, this book gives a fascinating insight into this two-year period, complemented by over 150 period pictures, many previously unpublished.

For the London to Sydney Marathon, team instructions included the recommendation that a firearm be carried by the crew of each car ... A small pistol which can conveniently be located under cover in the car is what we have in mind ...

The vision of one man, Captain Sherman "Red" Crise formed the basis for what was to become the Bahamas Speed Weeks, a series of motor races held on the island of New Providence in the Bahamas. They started in the mid 1950s and continued for 13 years, before ending due to a mix of political decisions, ill fortune and a shift in the direction motor racing had taken over that period of time. These years were described by many commentators as the golden age of motor racing, where internationally acclaimed drivers attended the Speed Weeks to mix with the many amateur racers from America who came to enjoy the scenario of sun, parties and racing. For many drivers the social scene was as important as the racing, and in latter years prize money was an extra incentive to turn up. This well researched account tracks the history of the Speed Weeks with its roller-coaster ride throughout its 13 years existence, and includes stunning photos, complete statistics, and more. With a foreword by Denise McCluggage.

The fifth in a series of books which chronicle in definitive depth the history of the evergreen 911, from the earliest design studies to the water-cooled cars of today. This volume looks at each 911 model and its derivative, taking in the various specials and competition cars along the way.

The Mini, the car of the 20th Century and still in motorsport in 1997, 35 years after its 1st event. This is its story. In the 60s the BMC works teams using Mini s were virtually unstoppable in their quest for recognition in the big world of rallying, they succeeded where others had failed and the BMC works teams were at the time probably the envy of the motorsport world. They introduced to the enthusiast the Special Tuning or ST as it was later known, a range of tuning products that the public could buy and fit to their own cars thus using the very same parts that the works team were using. Sadly the competition department was wound down and the ST finally went the same way in 1980. Imagine the excitement that hit the media when in the Autumn of 1993 Rover officially announced that they would fund the build of several cars to once again campaign the world famous Rallye Monte Carlo. Although they were not works cars, the large contribution of materials and money to the project it was regarded as tantamount to funding a works team, especially when Paddy Hopkirk was named as one of the drivers. It was this that started 4 years of Works backed mini s to varying degrees, culminating in 1996 to a full works backed team of 2 cars and a full campaign of rallies and races for the three years. Typically the Mini of the 90 s, similarly to the Mini of the 60 s, carried with it a fair degree of controversy. Over the next four years there was plenty of it, with money being diverted by the sponsor from one team to another, one car even being stolen and top rallying stars carrying out secret test sessions, being just a few examples. All of this using cars that were designed way back in the 50 s and even still using the same basic design of engine and gearbox against competitors who were using cars designed over thirty years later with modern engines and transmissions. This book highlights how the use of fuel injection, distributor-less ignition, six speed gearboxes and modern tyres all helped to bring the mighty mini once again to the foreground of modern rallying and racing. In 1996 the ST range of competition parts was re-introduced, with the parts coming from the latest 1996 build of works cars but once again in mid 1997 the project was pulled amid secrecy, sackings and bitter recriminations that

even to this day have prevented the authors from being able to speak to those that were involved behind the scenes at the end of the line for the Last Works Minis . With many unseen photos of the cars development, copies of Rovers internal documents, copy pages from the road books of top rallies, all of this in colour this book truly brings this previously untold story to life.

Years of meticulous research have resulted in this unique history, technical appraisal (including tuning and motorsports) and data book of the Ford V8 Cleveland 335 engines produced in the USA, Canada and Australia, including input from the engineers involved in the design, development and subsequent manufacture of this highly prized engine from its inception in 1968 until production ceased in 1982.

The British at Indianapolis recounts the history of the Indianapolis 500 race through the eyes and actions of those British born or British citizens who have driven in it, or been involved in any other way - be it as a designer, mechanic, or official. It also examines the British built cars that have won the Indy 500 and the significance of the rear engined revolution brought to the Indianapolis Motor Speedway by Cooper in 1961, and elevated to success by Lotus and Lola. It includes such names as Jim Clark, Graham Hill, Nigel Mansell and 2010 Indy 500 champion, and two times winner, Dario Franchitti.

The Lamborghini Urraco. The little baby Lambo that was meant to beat the Porsche 911 and Ferrari 308, but which ran into a myriad of problems. This book shows what really happened, and why the car never got the chance it deserved. The Urraco lived on as the Silhouette and Jalpa, and the Jalpa was greatly responsible for keeping the Lamborghini brand alive in the 80s. The full story of these V8 Lamborghinis is told here, with exclusive interviews from the leading figures behind the cars. The book also includes detailed chapters on what to look out for when buying one of these future supercar classics. Hundreds of amazing photos never published before makes this the ultimate book on the V8 Lamborghinis.

How the partnership between Ford and the UAW, forged through more than fifty pivotal events, transformed their capacity to combine good jobs with high performance. In 2009, the Ford Motor Company was the only one of the Big Three automakers not to take the federal bailout package. How did Ford remain standing when its competitors were brought to their knees? It was a gutsy decision, but it didn't happen in isolation. The United Auto Workers joined with Ford to make this possible—not only in 2009, but in a series of more than fifty pivotal events during three decades that add up to a transformation that simultaneously values work and delivers results. The pivotal events—some planned and some unplanned; some at the facility level and some at the enterprise level—were not all successful. All had the potential, however, to further the transformation, and all provide insight into how large-scale system change really happens. The authors—each with years of experience with Ford, the UAW, and the industry—provide an unprecedented inside look at how core operating assumptions are shifted and at the emergence of integrated operating systems for quality, safety, and other aspects of the enterprise. It is a transformation built on a foundation of dignity and mutual respect, guided by a vision of combining good jobs with high performance.

Sleeping Beauties USA honours rusted and forgotten automotive treasures that have been found parked alongside the highways of America, waiting to be discovered again. Rather than showcasing typically brilliant, highly rebuilt show queens, the book instead explores the transience and inherent beauty of a car's life, captured through stunning and evocative photography.
