Do you know all the hidden secrets that exist in the retail automobile business? If curiosity about the inner-most workings of the "car biz" has gotten the best of you or you are in immediate need of some money-saving tips on buying, leasing, selling or servicing a car or truck, then please use this book to prepare you for your next experience. For over 100 years, the automotive purchase experience has been a source of anxiety and discomfort to the consumer. That unfortunate circumstance was the motivating factor that caused us to write this book and to address those topics which we believe, will offer the most practical value, get some much needed information out in the open, correct some common misunderstandings and, explain those industry practices which seem to suffer most from the public's misconceptions. The majority of questions in this book will be answered from the consumers' perspective. We also believe that folks in the auto industry will find this book to be useful and informative text. We can make that last statement because, until the auto buying public is comfortably acquainted with the industry's practices AND, the industry recognizes that an educated consumer is its' best asset, we're all destined to suffer from the anxiety, distrust, suspicion and sense of inequality that's been welded onto buying, selling and servicing a car. This book is, by many measures, the first attempt to inform the consuming public of the elements associated with the automobile industry. We have accumulated over 40 years of experience in the auto industry and determined that responding to the many questions commonly asked by automotive consumers is a public service long overdue. We attempt to answer each of the following questions and many others: WHAT SHOULD MOTIVATE ME WHEN MAKING A VEHICLE PURCHASE DECISION? HOW CAN I BE SURE I'M MAKING A "GOOD VALUE" DECISION? ARE FEMALE AUTO BUYERS & SERVICE CUSTOMERS TREATED DIFFERENTLY? HOW DO I BETTER UNDERSTAND THE SALES PROCESS AT A DEALERSHIP? WHAT'S IMPORTANT ABOUT A "TEST DRIVE"? HOW MUCH PROFIT IS "REASONABLE" FOR A DEALERSHIP TO MAKE ON MY PURCHASE? WHAT DO I NEED TO KNOW ABOUT BUYING A USED VEHICLE? HOW DO I KNOW WHAT MY VEHICLE IS WORTH WHEN I TRADE IT IN? WHAT HAPPENS WHEN I HAVE MY VEHICLE SERVICED? HOW CAN I BE SURE THAT THE REPAIRS PERFORMED BY THE SERVICE DEPARTMENT WERE NECESSARY?

This book addresses two significant research areas in an interdependent fashion. It is first of all a comprehensive but concise text that covers the recently developed and widely applicable methods of qualitative choice analysis, illustrating the general theory through simulation models of automobile demand and use. It is also a detailed study of automobile demand and use, presenting forecasts based on these powerful new techniques. The book develops the general principles that underlie qualitative choice models that are now being applied in numerous fields in addition to transportation, such as housing, labor, energy, communications, and criminology. The general form, derivation, and estimation of qualitative choice models are explained, and the major models - logit, probit, and GEV - are discussed in detail. And continuous/discrete models are introduced. In these, qualitative choice methods and standard regression techniques are combined to analyze situations that neither alone can accurately forecast. Summarizing previous research on auto demand, the book shows how qualitative choice methods can be used by applying them to specific auto-related decisions as the aggregate of individuals' choices. The simulation model that is constructed is a significant improvement over older models, and should prove more useful to agencies and organizations requiring accurate forecasting of auto demand and use for planning and policy development. The book concludes with an actual case study based on a model designed for the investigations of the California Energy Commission. Kenneth Train is Visiting Associate Professor in Economics at the University of California, Berkeley, and Director of Economic Research at Cambridge Systematics, Inc., also in Berkeley. Qualitative Choice Analysis is included in The MIT Press Transportation Studies Series, edited by Marvin L. Manheim.
