What is xpressive? xpressive is a regular expression template library. Regular expressions (regexes) can be written as strings that are parsed dynamically at runtime (dynamic regexes), or as expression templates [9] that are parsed at compile-time (static regexes). Dynamic regexes have the advantage that they can be accepted from the user as input at runtime or read from an initialization file.

User's Guide - 1.54.0

This users' guide is organized as follows. After a Getting Started guide, we'll cover the tools Proto provides for defining and manipulating the three major parts of a compiler: Front Ends. How to define the aspects of your DSEL with which your users will interact directly. Intermediate Form ...
