##### **Wartsila Vasa 46C diesel engine - Diesel and Marine Group**

This is an 8L46 starting for the first time after one week in dry dock. You can hear the slow turning before it starts. Engine data: Cylinder bore: 460 mm Pi...

Wartsila Vasa 46C diesel engine Recently Leslie Blake went to view a magnificent Wartsila Vasa 46C engine - see below for some photographs of the interesting work she saw being carried out on this engine. Engine power ratings are determined by how the engine is being used. The Vasa engines offer 375 kW/cyl and 410 kW/cyl. As the number of cylinders are increased the power is increased. This also applies with the size of the bore, the 220 mm bore engine will provide less hp and kw than that of the 320 mm bore.

Vasa engines are turbocharged, non-reversible, and utilize a direct fuel injection system. They were designed to continuously run on HFO (heavy fuel oil), provided that the fuel is pre-heated and at the correct viscosity at the time of injection.

Wartsila Vasa 6R32 main Engine Spare Parts available like Plunger, Nozzle, Cylinder Head, Piston, Liner, Block, Valves. Contact us for all your requirements of Wartsila Vasa Engine Spare Parts.

Spares suitable for\* Wärtsilä and Wärtsilä Vasa diesel and gas engines. We stock wear parts including piston rings, main and large end bearings, cylinder liners, fuel injection equipment, filters and more. We also provide new or reconditioned major components, such as cylinder heads, connecting rods and pistons.
