The Lola T70 was the car that Eric Broadley wanted to build for Ford instead of the GT40. He thought the GT40 too conservative in specification for a state-of-the-art sports racing car, so he split with the giant corporation to build the T70 under the aegis of his own company: Lola. Immediately successful, the T70 carried John Surtees to the Championship in the 1966 Can-Am series. The cars were also very successful in Group 7 races until the series ended in 1966, by which time the likes of Denny Hulme, David Hobbs and Brian Redman had all driven T70s to victory. Under continuous development until the Mk IIIb Coupé of 1969, the T70 was never a great endurance racer but achieved major successes in shorter events such as the TT and Martini races. Today, the T70 is a leading force in historic racing. Over many years, John Starkey - T70 owner and ex-Curator of the famous Donington racing car collection - has compiled a huge amount of information on the cars and interviewed many past and present owners and drivers about their experiences with the T70. Uniquely, this book contains the history and specification - where known - of each individual T70 chassis. Available again after an absence of several years, here is the definitive development and racing history of the Lola T70.

In the past the 924 was often underrated, but nowadays enthusiasts appreciate the car's performance, build quality, practicality and affordability. This book records the full history of the 924, including motorsport, from inception until the end of production.

Lider, tarihin seyrini, zamanın akışını bir başka yöne çevirmesini bilen kişidir. Mustafa Kemal Atatürk, tüm bunları başararak, toplumunu içinde bulunduğu kısır döngüden çıkarmış, kendisiyle beraber çalışan arkadaşlarının bile akıllarının alamadığı cesur adımlar atmıştır. Dünyanın sayılı liderlerinden biri olarak kabul edilen önderimizi tanımak, onu anlamak gençlerimiz öncelikli olmak üzere hepimizin ödevidir. Gazi Mustafa Kemal, büyük bir komutan olduğu kadar aynı zamanda büyük bir devlet adamıydı. O, muharebelerde kati netice alınacak yeri iyi seçmesini biliyor, azami kuvvetini orada topluyor, mümkün olabilen en az zayıatla düşmana azami darbeyi vuruyordu. Gelibolu Conkbayırı'nda, Muş'un Ruslardan geri alınmasında, Afyon Kocatepe'de askeri ile yan yana bulunmuş, varlığı ile muharebenin kaderini değiştirmiş örnek bir komutandır. Doğru karar olay mahallinde ver-

ilir. Olay mahallinde bulunmak emek ister, cesaret ister, fedakârlık ister. Gazi Mustafa Kemal bunları yapmış birisidir.

Diagnostics, or fault finding, is a fundamental part of an automotive technician's work, and as automotive systems become increasingly complex there is a greater need for good diagnostic skills. Advanced Automotive Fault Diagnosis is the only book to treat automotive diagnostics as a science rather than a check-list procedure. Each chapter includes basic principles and examples of a vehicle system followed by the appropriate diagnostic techniques, complete with useful diagrams, flow charts, case studies and self-assessment questions. The book will help new students develop diagnostic skills and help experienced technicians improve even further. This new edition is fully updated to the latest technological developments. Two new chapters have been added - On-board diagnostics and Oscilloscope diagnostics - and the coverage has been matched to the latest curricula of motor vehicle qualifications, including: IMI and C&G Technical Certificates and NVQs; Level 4 diagnostic units; BTEC National and Higher National qualifications from Edexcel; International Motor Vehicle qualifications such as C&G 3905; and ASE certification in the USA.

The familiar yellow Technical Instruction series from Bosch have long proved one of their most popular instructional aids. They provide a clear and concise overview of the theory of operation, component design, model variations, and technical terminology for the entire Bosch product line, and give a solid foundation for better diagnostics and servicing. Clearly written and illustrated with photos, diagrams and charts, these books are equally at home in the vocational classroom, apprentices toolkit, or enthusiasts fireside chair.
