Hacking wifi using Wifite in Kali Linux

Attacking WEP protected WiFi points. WEP is an old and deprecated way of protecting WiFi passwords, so if you find one, you are in luck. WEP takes substantially less time. This is easily automated in Wifite, and it even uses multiple attacks against routers to get the password. You only need around ~10 to 120 minutes to crack WEP, maybe longer.

While the aircrack-ng suite is a well known name in the wireless hacking, the same can't be said about Wifite. Living in the shade of the greatness of established aircrack-ng suite, Wifite has finally made a mark in a field where aircrack-ng failed. It made wifi hacking everyone's piece of cake.
