A brand-new contemporary novel from bestselling author Eric Walters Still reeling from a breakup with his long-term girlfriend, Graham Fox is less than thrilled to have to move to a new city and switch schools for senior year. But his decision to keep his head down and just get through the year is quickly challenged by Ethan Frost, former basketball player and trouble maker, whose talent at getting girls to go out with him is unmatched. In fact, he seems to have it down to an infallible science. Almost. Graham soon finds himself playing the role of wingman, as Ethan plunges them into a whirlwind of all-ages clubs, diners, support groups -- anywhere there's a chance to meet girls. Distracted from his own pain, Graham finds himself absorbing the "lessons" from Ethan, turning meeting girls into a game. That is, until he meets someone who challenges everything Ethan has taught him.

Set in the future when "firemen" burn books forbidden by the totalitarian "brave new world" regime.

A revealing and surprising look at how classification systems can shape both world-views and social interactions. What do a seventeenth-century mortality table (whose causes of death include "fainted in a bath," "frighted," and "itch"); the identification of South Africans during apartheid as European, Asian, colored, or black; and the separation of machine- from hand-washables have in common? All are examples of classification—the scaffolding of information infrastructures. In *Sorting Things Out*, Geoffrey C. Bowker and Susan Leigh Star explore the role of categories and standards in shaping the modern world. In a clear and lively style, they investigate a variety of classification systems, including the International Classification of Diseases, the Nursing Interventions Classification, race classification under apartheid in South Africa, and the classification of viruses and of tuberculosis. The authors emphasize the role of invisibility in the process by which classification orders human inter-

action. They examine how categories are made and kept invisible, and how people can change this invisibility when necessary. They also explore systems of classification as part of the built information environment. Much as an urban historian would review highway permits and zoning decisions to tell a city's story, the authors review archives of classification design to understand how decisions have been made. *Sorting Things Out* has a moral agenda, for each standard and category valorizes some point of view and silences another. Standards and classifications produce advantage or suffering. Jobs are made and lost; some regions benefit at the expense of others. How these choices are made and how we think about that process are at the moral and political core of this work. The book is an important empirical source for understanding the building of information infrastructures.

With the unrelenting unrest in places such as Iraq, Afghanistan and the Sudan, the plight of refugees has become an increasingly discussed topic in international relations. Why do we have refugees? When did the refugee 'problem' emerge? How can the refugee ever be reconciled with an international system that rests on sovereignty? Looking at three key periods - the inter-war period, the Cold War and the present day - Emma Haddad demonstrates how a specific image has defined the refugee since the international states system arose in its modern form and that refugees have thus been qualitatively the same over the course of history. This historical and normative approach suggests new ways to understand refugees and to formulate responses to them. By examining the issue from an international society perspective, this book highlights how refugees are an inevitable, if unanticipated, result of erecting political borders.

Nominated for an NAACP Image Award A Publishers Weekly Top 10 History Title for the season Booklist's Top 10 Diverse Nonfiction titles for the year BookRiot's "50 Must-Read Poetry Collections" Most An-

anticipated Books of the Year--The Rumpus, Nylon A revelatory work in the tradition of Claudia Rankine's *Citizen*, DaMaris Hill's searing and powerful narrative-in-verse bears witness to American women of color burdened by incarceration. "It is costly to stay free and appear / sane." From Harriet Tubman to Assata Shakur, Ida B. Wells to Sandra Bland and Black Lives Matter, black women freedom fighters have braved violence, scorn, despair, and isolation in order to lodge their protests. In *A Bound Woman Is a Dangerous Thing*, DaMaris Hill honors their experiences with at times harrowing, at times hopeful responses to her heroes, illustrated with black-and-white photographs throughout. For black American women, the experience of being bound has taken many forms: from the bondage of slavery to the Reconstruction-era criminalization of women; from the brutal constraints of Jim Crow to our own era's prison industrial complex, where between 1980 and 2014, the number of incarcerated women increased by 700%.* For those women who lived and died resisting the dehumanization of confinement---physical, social, intellectual--the threat of being bound was real, constant, and lethal. In *A Bound Woman Is a Dangerous Thing*, Hill presents bitter, unflinching history that artfully captures the personas of these captivating, bound yet unbridled African-American women. Hill's passionate odes to Zora Neale Hurston, Lucille Clifton, Fannie Lou Hamer, Grace Jones, Eartha Kitt, and others also celebrate the modern-day inheritors of their load and light, binding history, author, and reader in an essential legacy of struggle. *The Sentencing Project

scribes and compares conceptually the Fire Weather Index (FWI) system of Canada and the National Fire Danger Rating System (NFDRS) of the USA. The relatively simple FWI system rates fire danger for all Canada and is based on empirical field-data derived from a single fuel type. The laboratory-based NFDRS, in contrast, allows more specification for distinct fire danger areas and models fuel moisture more abstract and in different classifications. Relative strengths and weaknesses with regard to the vegetative conditions in the particular country are discussed. The use of empirical data and the good and simple representation of soil moisture are the major strengths of the FWI system. The NFDRS wins through its possibility to model specifically a distinct fire danger area and through the consideration of live fuel moisture content. The conclusion of this paper is that both systems can benefit from each other. A combination of the simplicity of the FWI and specialization on a distinct area through the site descriptors similar to the ones of the NFDRS is proposed.

The now-classic *Metaphors We Live By* changed our understanding of metaphor and its role in language and the mind. Metaphor, the authors explain, is a fundamental mechanism of mind, one that allows us to use what we know about our physical and social experience to provide understanding of countless other subjects. Because such metaphors structure our most basic understandings of our experience, they are "metaphors we live by"—metaphors that can shape our perceptions and actions without our ever noticing them. In this updated edition of Lakoff and Johnson's influential book, the authors supply an afterword surveying how their theory of metaphor has developed within the cognitive sciences to become central to the contemporary understanding of how we think and how we express our thoughts in language.

"In a gloomy, smoke-filled world where the sun has vanished, all light and warmth comes from the firestones mined underground by the Quelled – a people branded by the race known as Chosen. On her sixteenth birthday, the rebellious Quelled girl Elsha is selected as handmaid to the Firelord – the most powerful of the Chosen. Suddenly Elsha is swept into a world of privilege, but also of prejudice and hatred and inequality. And her pursuit of her vision of a world of warmth, as sung about in the ancient myths, leads her on a dangerous path..."

Rae Langton here draws together her ground-breaking and contentious work on pornography and objectification. She shows how women come to be objectified and she argues for the controversial feminist conclusions that pornography subordinates and silences women, and women have rights against pornography. In this classic text, the first full-scale application of cognitive science to politics, Ge-

orge Lakoff analyzes the unconscious and rhetorical worldviews of liberals and conservatives, discovering radically different but remarkably consistent conceptions of morality on both the left and right. For this new edition, Lakoff adds a preface and an afterword extending his observations to major ideological conflicts since the book's original publication, from the impeachment of Bill Clinton to the 2000 presidential election and its aftermath.

"Its publication should be a major event for cognitive linguistics and should pose a major challenge for cognitive science. In addition, it should have repercussions in a variety of disciplines, ranging from anthropology and psychology to epistemology and the philosophy of science. . . . Lakoff asks: What do categories of language and thought reveal about the human mind? Offering both general theory and minute details, Lakoff shows that categories reveal a great deal."—David E. Leary, *American Scientist*

Emma Watson's *Our Shared Shelf* book club choice *New York Times* bestseller 'Fascinating.' *Sunday Times* 'Thrilling.' ?????? Mail on Sunday All they wanted was the chance to shine. Be careful what you wish for... 'The first thing we asked was, "Does this stuff hurt you?" And they said, "No." The company said that it wasn't dangerous, that we didn't need to be afraid.' As the First World War spread across the world, young American women flocked to work in factories, painting clocks, watches and military dials with a special luminous substance made from radium. It was a fun job, lucrative and glamorous – the girls shone brightly in the dark, covered head to toe in dust from the paint. However, as the years passed, the women began to suffer from mysterious and crippling illnesses. It turned out that the very thing that had made them feel alive – their work – was slowly killing them: the radium paint was poisonous. Their employers denied all responsibility, but these courageous women – in the face of unimaginable suffering – refused to accept their fate quietly, and instead became determined to fight for justice. Drawing on previously unpublished diaries, letters and interviews, *The Radium Girls* is an intimate narrative of an unforgettable true story. It is the powerful tale of a group of ordinary women from the Roaring Twenties, who themselves learned how to roar. Further praise for *The Radium Girls* 'The importance of the brave and blighted dial-painters cannot be overstated.' *Sunday Times* 'A perfect blend of the historical, the scientific and the personal.' *Bustle* 'Thrilling and carefully crafted.' Visualizing information in the most elegant, entertaining, and informative ways. Provides guidelines for United States Democrats to connect moral values to important policies, using practical tactics to guide political discourse away from extreme positions.

When *Moral Politics* was first published two decades ago, it redefined how Americans think and talk about politics through the lens of cognitive political psychology. Today, George Lakoff's classic text has become all the more relevant, as liberals and conservatives have come to hold even more vigorously opposed views of the world, with the underlying assumptions of their respective worldviews at the level of basic morality. Even more so than when Lakoff wrote, liberals and conservatives simply have very different, deeply held beliefs about what is right and wrong. Lakoff reveals radically different but remarkably consistent conceptions of morality on both the left and right. Moral worldviews, like most deep ways of understanding the world, are unconscious—part of our “hard-wired” brain circuitry. When confronted with facts that don't fit our moral worldview, our brains work automatically and unconsciously to ignore or reject these facts, and it takes extraordinary openness and awareness of this phenomenon to pay critical attention to the vast number of facts we are presented with each day. For this new edition, Lakoff has added a new preface and afterword, extending his observations to major ideological conflicts since the book's original publication, from the Affordable Care Act to the wars in Iraq and Afghanistan, the recent financial crisis, and the effects of global warming. One might have hoped such massive changes would bring people together, but the reverse has actually happened; the divide between liberals and conservatives has become stronger and more virulent. To have any hope of bringing mutual respect to the current social and political divide, we need to clearly understand the problem and make it part of our contemporary public discourse. *Moral Politics* offers a much-needed wake-up call to both the left and the right.

Illustrated in color, and black and white, this book is designed to provide information to men of all ages. The chapters include: The Seven Ancient Wonders of the World, Conkers, Laws of Football, Dinosaurs, Fishing, Juggling, Timers and Tripwires, Kings and Queens, Famous Battles, Spies, Making Crystals, Insects and Spiders, Artillery, and Girls.

Don't Think of An Elephant is the antidote to decades of conservative strategising

and the right's stranglehold on political dialogue. More specifically, it is the definitive handbook for understanding and communicating effectively about key social and political issues. George Lakoff explains in detail exactly how the right has managed to co-opt traditional values in order to popularise its political agenda. He also provides examples of how the centre-left can address the community's core values and reframe political debate to establish a civil discourse that reinforces progressive positions. *Don't Think of An Elephant* provides a compelling linguistic analysis of political campaigning. But, more importantly, it demonstrates that real political values and ideas must provide the foundation for political progress by the centre-left.

News • Mental Floss • Paste "I devoured *Daisy Jones & The Six* in a day, falling head over heels for it. *Daisy* and the band captured my heart." —Reese Witherspoon (Reese's Book Club x Hello Sunshine book pick) A gripping novel about the whirlwind rise of an iconic 1970s rock group and their beautiful lead singer, revealing the mystery behind their infamous breakup. Everyone knows *Daisy Jones & The Six*: The band's album *Aurora* came to define the rock 'n' roll era of the late seventies, and an entire generation of girls wanted to grow up to be *Daisy*. But no one knows the reason behind the group's split on the night of their final concert at Chicago Stadium on July 12, 1979 . . . until now. *Daisy* is a girl coming of age in L.A. in the late sixties, sneaking into clubs on the Sunset Strip, sleeping with rock stars, and dreaming of singing at the *Whisky a Go Go*. The sex and drugs are thrilling, but it's the rock 'n' roll she loves most. By the time she's twenty, her voice is getting noticed, and she has the kind of heedless beauty that makes people do crazy things. Also getting noticed is *The Six*, a band led by the brooding Billy Dunne. On the eve of their first tour, his girlfriend Camila finds out she's pregnant, and with the pressure of impending fatherhood and fame, Billy goes a little wild on the road. *Daisy* and Billy cross paths when a producer realizes that the key to supercharged success is to put the two together. What happens next will become the stuff of legend. The making of that legend is chronicled in this riveting and unforgettable novel, written as an

oral history of one of the biggest bands of the seventies. Taylor Jenkins Reid is a talented writer who takes her work to a new level with *Daisy Jones & The Six*, brilliantly capturing a place and time in an utterly distinctive voice.

Life-enhancing, packed with poetry and philosophical bon mots, *Dangerous Women: The Guide to Modern Life* draws on the experience of three dangerously knowledgeable women to offer practical but humorous advice, with an understanding of the finer art of living. With over 600 entries, from 'Accepting a compliment' and 'Affairs' to 'Entering a convent', 'Family therapy', 'I don't', 'Teenagers' and 'Wolf-whistling', this is the perfect bedside companion for the modern woman. Mothers, sisters, daughters and girlfriends are constantly asking themselves, and each other, questions about what it means to be a modern woman. *Dangerous Women* sparkles with the answers.

Seventeen-year-old Isra prefers reading books to entertaining the suitors her father has chosen for her. Over the course of a week, the naïve and dreamy girl finds herself quickly

betrothed and married, and is soon living in Brooklyn. There Isra struggles to adapt to the expectations of her oppressive mother-in-law Fareeda and strange new husband Adam, a pressure that intensifies as she begins to have children—four daughters instead of the sons Fareeda tells Isra she must bear. Brooklyn, 2008. Eighteen-year-old Deya, Isra's oldest daughter, must meet with potential husbands at her grandmother Fareeda's insistence, though her only desire is to go to college. Deya can't help but wonder if her options would have been different had her parents survived the car crash that killed them when Deya was only eight. But her grandmother is firm on the matter: the only way to secure a worthy future for Deya is through marriage to the right man. But fate has a will of its own, and soon Deya will find herself on an unexpected path that leads her to shocking truths about her family—knowledge that will force her to question everything she thought she knew about her parents, the past, and her own future.

Over the past decade, Cognitive Linguistics has grown to be one of the most broadly appealing and dynamic frameworks for the study of natural language. Essentially, this new school of linguistics focuses on the meaning side of language: linguistic form is analysed as an expression of meaning. And meaning itself is not something that exists in isolation, but it is integrated with the full spectrum of human experience: the fact that we are embodied beings just as much as the fact that we are cultural beings. *Cognitive Linguistics: Basic Readings* brings together twelve foundational articles, each of which introduces one of the basic concepts of Cognitive Linguistics, like conceptual metaphor, image schemas, mental spaces, construction grammar, prototypicality and radial sets. The collection features the founding fathers of Cognitive Linguistics: George Lakoff, Ron Langacker, Len Talmy, Gilles Fauconnier, and Charles Fillmore, together with some of the most influential younger scholars. By its choice of seminal papers and leading authors, *Basic Readings* is specifically suited for an introductory course in Cognitive Linguistics. This is further supported by a general introduction to the theory and, specifically, the practice of Cognitive Linguistics and by trajectories for further reading that start out from the individual chapters.

Lakoff takes a fresh look at how we think and talk about politics and shows that political and moral ideas develop in systematic ways from our models of ideal families. Arguing that conservatives have exploited the connection between morality, the famil-

ity and politics, while liberals have failed to recognize it, Lakoff explains why the conservative moral position has not been effectively challenged.

What are human beings like? How is knowledge possible? What is truth? Where do moral values come from? Questions like these have stood at the center of Western philosophy for centuries. In addressing them, philosophers have made certain fundamental assumptions—that we can know our own minds by introspection, that most of our thinking about the world is literal, and that reason is disembodied and universal—that are now called into question by well-established results of cognitive science. It has been shown empirically that: Most thought is unconscious. We have no direct conscious access to the mechanisms of thought and language. Our ideas go by too quickly and at too deep a level for us to observe them in any simple way. Abstract concepts are mostly metaphorical. Much of the subject matter of philosophy, such as the nature of time, morality, causation, the mind, and the self, relies heavily on basic metaphors derived from bodily experience. What is literal in our reasoning about such concepts is minimal and conceptually impoverished. All the richness comes from metaphor. For instance, we have two mutually incompatible metaphors for time, both of which represent it as movement through space: in one it is a flow past us and in the other a spatial dimension we move along. Mind is embodied. Thought requires a body—not in the trivial sense that you need a physical brain to think with, but in the profound sense that the very structure of our thoughts comes from the nature of the body. Nearly all of our unconscious metaphors are based on common bodily experiences. Most of the central themes of the Western philosophical tradition are called into question by these findings. The Cartesian person, with a mind wholly separate from the body, does not exist. The Kantian person, capable of moral action according to the dictates of a universal reason, does not exist. The phenomenological person, capable of knowing his or her mind entirely through introspection alone, does not exist. The utilitarian person, the Chomskian person, the poststructuralist person, the computational person, and the person defined by analytic philosophy all do not exist. Then what does? Lakoff and Johnson show that a philosophy responsible to the science of mind offers radically new and detailed understandings of what a person is. After first describing the philosophical stance that must follow from taking cognitive science seriously, they re-examine the

basic concepts of the mind, time, causation, morality, and the self: then they rethink a host of philosophical traditions, from the classical Greeks through Kantian morality through modern analytic philosophy. They reveal the metaphorical structure underlying each mode of thought and show how the metaphysics of each theory flows from its metaphors. Finally, they take on two major issues of twentieth-century philosophy: how we conceive rationality, and how we conceive language.

Cognitive Linguistics argues that language is governed by general cognitive principles, rather than by a special-purpose language module. This introductory textbook surveys the field of cognitive linguistics as a distinct area of study, presenting its theoretical foundations and the arguments supporting it. Clearly organised and accessibly written, it provides a useful introduction to the relationship between language and cognitive processing in the human brain. It covers the main topics likely to be encountered in a course or seminar, and provides a synthesis of study and research in this fast-growing field of linguistics. The authors begin by explaining the conceptual structures and cognitive processes governing linguistic representation and behaviour, and go on to explore cognitive approaches to lexical semantics, as well as syntactic representation and analysis, focusing on the closely related frameworks of cognitive grammar and construction grammar. This much-needed introduction will be welcomed by students in linguistics and cognitive science.

Uncover a riveting story of palace intrigue set in a sumptuous Asian-inspired fantasy world in the breakout YA novel that Publisher's Weekly calls "elegant and adrenaline-soaked." In this richly developed fantasy, Lei is a member of the Paper caste, the lowest and most persecuted class of people in Ikhara. She lives in a remote village with her father, where the decade-old trauma of watching her mother snatched by royal guards for an unknown fate still haunts her. Now, the guards are back and this time it's Lei they're after -- the girl with the golden eyes whose rumored beauty has piqued the king's interest. Over weeks of training in the opulent but oppressive palace, Lei and eight other girls learn the skills and charm that befit a king's consort. There, she does the unthinkable: she falls in love. Her forbidden romance becomes enmeshed with an explosive plot that threatens her world's entire way of life. Lei, still the wide-eyed country girl at heart, must decide how far she's willing to go for justice and revenge.

A New York Times best-selling author explains how the physical nature of the brain affects people's political decisions, suggest-

ing that changing one's mind is just as much a physical process as it is a psychological function. By the author of *Don't Think of an Elephant!* 60,000 first printing. A study of the cognitive science of mathematical ideas.

"The authors restore metaphor to our lives by showing us that it's never gone away. We've merely been taught to talk as if it had: as though weather maps were more 'real' than the breath of autumn; as though, for that matter, Reason was really 'cool.' What we're saying whenever we say is a theme this book illumines for anyone attentive." — Hugh Kenner, Johns Hopkins University "In this bold and powerful book, Lakoff and Turner continue their use of metaphor to show how our minds get hold of the world. They have achieved nothing less than a postmodern *Understanding Poetry*, a new way of reading and teaching that makes poetry again important." — Norman Holland, University of Florida

Since September 11, 2001, the Bush administration has relentlessly invoked the word "freedom." Al-Qaeda attacked us because "they hate our freedom." The U.S. can strike preemptively because "freedom is on the march." Social security should be privatized in order to protect individual freedoms. The 2005 presidential inaugural speech was a kind of crescendo: the words "freedom," "free," and "liberty," were used forty-nine times in President Bush's twenty-minute speech. In *Whose Freedom?*, Lakoff surveys the political landscape and offers an essential map of the Republican battle plan that has captured the hearts

and minds of Americans--and shows how progressives can fight to reinvigorate this most beloved of American political ideas.
