Bernt Spiegel's *The Upper Half of the Motorcycle* was a best-selling motorcycling book in its original German with multiple editions and printings to its credit. Now translated into English, its provocative message is available to a wider audience. Spiegel's

metaphor considers the rider and the motorcycle as a single unit, the rider being the upper half. Taking a multidisciplinary approach, the author draws on anthropology, psychology, biology, physics, and other disciplines to analyze the theory and function of the man-machine unit. Motorcycle riding is seen as a junction where people have created machines for personal transport and then become so adept at using them that the machine becomes like an extension of the rider themselves. The ultimate goal for riders is the integration of the man-machine interface and subsequent skill development to the point of virtuosity. Spiegel considers the various aspects of motorcycle riding that must be understood, practiced, and mastered before virtuosity can be attained. Many anecdotes, supplementary material, and in-depth treatment of specialized topics is contained in sidebars and footnotes. Numerous diagrams and photographs illustrate the book's principles allowing the reader to consider and develop their riding skill set.

Zoe Rose never quite fit in. As the only kid in kindergarten with an enormous red afro, Zoe was taunted by the other little girls for refusing to share her "Annie" wig, even when she swore it was her own hair (it was). In second grade, after seeing her best friend ridiculed for wearing a dirty, pink, polka-dot party dress to school every day, she became obsessed with understanding what makes normal girls tick and why they're so cruel to the girls who never seem to "get it." And so Zoe begins a lifelong study of girl behavior, and by thirty, finds herself editor of Issues magazine. Determined to raid the locker room of the female psyche and rip open the frilly façade of femininity once and for all, she sets out

to reform an entire nation of women, beginning with the readers of the most notorious magazine on Madison Avenue. It's the feminist vs. the fashionistas. Can Zoe stop girls from behaving badly toward other girls, and turn them into a strong, united force that can succeed in our male-dominated world? Or will her spectacularly warped sense of humor, pathetic wardrobe, and plethora of psychosomatic illnesses get her eaten alive? Zoe's willing to risk losing it all, including her mind, but she'll walk away with something she never dreamed she wanted: the little girl hiding inside of her. Each Haynes manual provides specific and detailed instructions for performing everything from basic maintenance and troubleshooting to a complete overhaul of the machine, in this case the Yamaha Seca II (XJ600S), model years 1992-2003. The story of the ultimate Honda power cruiser.

Young and beautiful, Lois Pryce was a rising star at the BBC. Unbeknownst to her co-workers, Lois lived a parallel life as a biker

babe with an overwhelming sense of wanderlust. So she packed in her career to ride her motorcycle on her own from the northernmost tip of Alaska to the southernmost tip of South America. Alone. Armed only with the Spanish words for 'caution' and 'cheese', Lois was rather under-prepared for multiple bear sightings, bribing her way through borders, spending a night in a Mexican brothel and crashing her bike in the wilds of Patagonia. She most certainly got the adventure she craved, and her pulse-pounding, soul-searching adventure has already attracted fans worldwide - a weblog that she kept whilst on her travels was receiving more than two-thousand hits a day. Her hilarious, brilliantly written travelog will appeal to anyone who's ever dreamt of jacking-it-all-in and running away to see the world.

This is one in a series of manuals for car or motorcycle owners. Each book provides information on routine maintenance and servicing, with tasks described and photographed in a step-by-step sequence so that even a novice can do the work.
